STROBE Statement—checklist of items that should be included in reports of observational studies

Section/item	Item No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Page 2	In the part of the Methods.
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Page 1-2	In the part of the Methods,
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Page 4-5	Paragraph 1-2 in the Introduction.
Objectives	3	State specific objectives, including any prespecified hypotheses	Page 5	The 3rd paragraph in the
Methods				
Study design	4	Present key elements of study design early in the paper	Page 5	Paragraph 1 in the
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page 5-7	The Study Population in the Methods
Participants	6	(a) ***Cohort study***—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up ***Case-control study***—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls ***Cross-sectional study***—Give the eligibility criteria, and the sources and methods of selection of participants	Page 5-6	Paragraph 1 in the Methods
		(b) ***Cohort study***—For matched studies, give matching criteria and number of exposed and unexposed ***Case-control study***—For matched studies, give matching criteria and the number of controls per case	N/A	Not applicable
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Page 6-7	The Data collection and statistical analysis in the
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Page 16	in the Ttable 1
Bias	9	Describe any efforts to address potential sources of bias	Page 6-7	The Data collection and
Study size	10	Explain how the study size was arrived at	Page 5	Paragraph 1 in the
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Page 7	The last paragraph in the Methods

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	Page 6-7	The Data collection and
		(b) Describe any methods used to examine subgroups and interactions	Page 6-7	The Data collection and
		(c) Explain how missing data were addressed	None	The relevent data needed
		(d) ***Cohort study***—If applicable, explain how loss to follow-up was addressed ***Case-control study***—If applicable, explain how matching of cases and controls was addressed ***Cross-sectional study***—If applicable, describe analytical methods taking account of sampling strategy	Page 6	Paragraph 3 in the Methods
		(e) Describe any sensitivity analyses	None	Sensitivity analyses was
Results				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	page 7-8	Paragraph 1 in the Results
		(b) Give reasons for non-participation at each stage	None	No non-participation at
		(c) Consider use of a flow diagram	None	It is unnecessary to use a
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	page 7-8	Paragraph 1 in the Results
		(b) Indicate number of participants with missing data for each variable of interest	None	The relevent data needed
		(c) ***Cohort study***—Summarise follow-up time (eg, average and total amount)	N/A	Not applicable
Outcome data	15*	***Cohort study***—Report numbers of outcome events or summary measures over time	N/A	Not applicable
		Case-control study—Report numbers in each exposure category, or summary measures of exposure	N/A	Not applicable
		Cross-sectional study—Report numbers of outcome events or summary measures	Page 8-10, Page 17-18	The Regression Analysis
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Page 8-10, Page 17-19	In the Results and Table 2-4
		(b) Report category boundaries when continuous variables were categorized	Page 8-10, Page 17-18	The Regression Analysis
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	N/A	Not applicable
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	Page 10	The Residual analysis and
Discussion				
Key results	18	Summarise key results with reference to study objectives	Page 10-11	The Main findings in the
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	Page 14	The Study Limitations in the Discussion.

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Page 10-14	In the Discussion.
Generalisability	21	Discuss the generalisability (external validity) of the study results	Page 11-14	The Left ventricular size
Other information				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	None.	No funding participated in this research.

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
