The 2017 Digestive Disease Institute Week (DDI Week) organized by the Cleveland Clinic was held successfully in Boca Raton, Florida, from Feb 14<sup>th</sup> to 18<sup>th</sup>. As a grand feast in the field of digestive disease, the symposium attracted numerous experts from all over the world to get together to have deep discussion on hot topics in the digestive field, including transanal endoscopic surgery (TES), transanal total mesorectal excision (TaTME), fecal incontinence and rectal prolapse, revisional bariatric/metabolic interventions (RBMI), etc.

During this symposium, Prof. Raul Rosenthal, from, Cleveland Clinic Florida, had brought an excellent presentation on “Mental Conditioning for Surgeons to Optimize Performance”, earning a lot applause from the audience. Seizing this opportunity, the Editorial Office of *Annals of Laparoscopic and Endoscopic Surgery (ALES)* was honored to have an interview with Prof. Rosenthal (Figure 1).

At beginning of the interview, Prof. Rosenthal introduced with us how the mental conditioning developed from other fields, like application in music, then to be applied in medical field and how it works for surgeons to optimize performance.

During this symposium, there's a section for the discussion of RBMI, in which numerous sparkles were inspired through all the participants. As a pioneer in the bariatric surgery, Prof. Rosenthal actively devoted to the discussion and gave his precious views on almost every question. In the interview, Prof. Rosenthal also shared with us many of his opinion about the RBMI, including its indication, result to our patients, future focus, etc.

Moreover, Prof. Rosenthal as well told us three of his way of updating himself with the latest progress—social media, meetings and reviewing of papers.

When talking about “what's in bariatric surgery that keeps you going ahead”, Prof. Rosenthal instantly told us his answer—patient's satisfaction keeps him progressing all the time (Figure 2)!

## Interview questions

- (I) In your previous presentation, you shared with us a topic on “Mental Conditioning for Surgeons to Optimize Performance”, which is interesting. Here would you share with us some main points of your presentation? How should surgeons do to optimize performance via mental conditioning?
- (II) We know that you previously were the president of the American Society for Metabolic and Bariatric

Surgery and a pioneer in the bariatric surgery. In the symposium, there's also a section for RBMI. Here based on your experience, would you tell us what's the indication for the RBMI? What you've discussed about the indication?

- (III) RBMI increases quite fast. In your opinion, why is the prevalence of RBMI increasing dramatically?
- (IV) Does RBMI always have good result to our patients?
- (V) What should be the focus of RBMI in the future?
- (VI) Would you tell us what's in bariatric surgery that keeps you going ahead in this field?
- (VII) As we know, you're so busy. Then how do you update yourself with the latest progress?

### Expert introduction

Prof. Raul J. Rosenthal, MD, serves as Scientific and Clinical Advisor of Barosense Inc. Prof. Rosenthal serves as the Head of Section of Minimally Invasive and Endoscopic Surgery at CCF. Since 1999, he has been Chairman of the Department of Minimally Invasive and Bariatric Surgery at Cleveland Clinic Florida. Prof. Rosenthal serves as a Member of Medical Advisory Board of MST Medical Surgical Technologies Ltd. Prof. Rosenthal serves as Member of Commercialization Council of Cleveland Clinic Innovations. Prof. Rosenthal serves as Professor of Surgery and Chairman of Section of Minimally Invasive Surgery at the Bariatric and Metabolic Institute. Prof. Rosenthal serves as Program Director of Fellowship in Minimally Invasive Surgery at the Cleveland Clinic Florida. He is Graduate of Medical School in Rosario, Argentina. He trained as a general surgeon at the Provincial Hospital in Rosario Argentina between 1981 and 1983, and emigrated to Germany to repeat medical degree and general surgical residency training between 1983 and 1990.
