STROBE Statement—checklist of items that should be included in reports of observational studies

Section/item	Item No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Page1Line 3-5	Title
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Page1Line	Abstract
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Page 3Line1-Page4Line 16	Introduction section Paragraph1-4
Objectives	3	State specific objectives, including any prespecified hypotheses	Page4Line16-25	Introduction section
Methods				
Study design	4	Present key elements of study design early in the paper	Page 4Line 30	Methods section Study
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page 5Line13-33	Methods section Data source paragraph
Participants	6	(a) ***Cohort study***—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up ***Case-control study***—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls ***Cross-sectional study***—Give the eligibility criteria, and the sources and methods of selection of participants	Page 5Line34-Page6 Line21	Methods section Study population paragraph
		(b) ***Cohort study***—For matched studies, give matching criteria and number of exposed and unexposed ***Case-control study***—For matched studies, give matching criteria and the number of controls per case	NA	this is a cross-sectional study.
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Page 6Line 23-Page7 Line 12	Methods section Main outcomes paragraph
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Page 6Line 23-Page7 Line 12	Methods section Main outcomes paragraph
Bias	9	Describe any efforts to address potential sources of bias	this is a cross-sectional	this is a cross-sectional
Study size	10	Explain how the study size was arrived at	Page 5Line17-19	Methods section Data
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Page 7Line 14-25	Methods section Statistical analysis paragraph

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	Page 7Line 14-25	Methods section Statistical
		(b) Describe any methods used to examine subgroups and interactions	NA	no subgroups existed in
		(c) Explain how missing data were addressed	Page 7Line 14-25	Methods section Statistical
		(d) ***Cohort study***—If applicable, explain how loss to follow-up was addressed ***Case-control study***—If applicable, explain how matching of cases and controls was addressed ***Cross-sectional study***—If applicable, describe analytical methods taking account of sampling strategy	Page 7Line 14-25	no sampling strategy existed in this study.
		(e) Describe any sensitivity analyses	NA	no sensitivity analyses
Results				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Page7Line30-32	Results Section Demographic
		(b) Give reasons for non-participation at each stage	Page7Line30-32	Results Section
		(c) Consider use of a flow diagram	Page14 line1-3	Figure 1
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	Page 7Line33-Page8Line7	Results section Demographic
		(b) Indicate number of participants with missing data for each variable of interest	Page 7Line33-Page8Line7	no missing data existed
		(c) ***Cohort study***—Summarise follow-up time (eg, average and total amount)	NA	this is a cross-sectional
Outcome data	15*	***Cohort study***—Report numbers of outcome events or summary measures over time	NA	this is a cross-sectional
		Case-control study—Report numbers in each exposure category, or summary measures of exposure	NA	this is a cross-sectional
		Cross-sectional study—Report numbers of outcome events or summary measures	Page 8Line9- Page9 Line	Results section
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Page 8Line9- Page9 Line 34	Results section Department analysis,
		(b) Report category boundaries when continuous variables were categorized	Page 8Line9- Page9 Line	Results section
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	NA	it is not relevant
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	NA	no other analyses existed
Discussion				
Key results	18	Summarise key results with reference to study objectives	Page	Conclusion section
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	Page 11Line19-Page12 Line4	Conclusion section Paragraph 7

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Page 10Line4-Page11Line18	Conclusion section Paragraph1-6
Generalisability	21	Discuss the generalisability (external validity) of the study results	Page 11Line19-Page12	Conclusion section
Other information				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	Page12Line21-22	Acknowledgements Section

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
