STROBE Statement—checklist of items that should be included in reports of observational studies

Section/item	Item No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Lines1-7, page1	Title and Methods section of Abstract
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Lines12-18, page1	Abstract
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Lines2-8, page3	Introduction
Objectives	3	State specific objectives, including any prespecified hypotheses	lines 9-15, page3	Introduction
Methods				
Study design	4	Present key elements of study design early in the paper	lines20-26, page3	Methods
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	lines22-26, page3	Methods
Participants	6	(a) ***Cohort study***—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up ***Case-control study***—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls ***Cross-sectional study***—Give the eligibility criteria, and the sources and methods of selection of participants	lines27-30, page3 and line 1-9, page 4	cohort study-introduction
		(b) ***Cohort study***—For matched studies, give matching criteria and number of exposed and unexposed ***Case-control study***—For matched studies, give matching criteria and the number of controls per case	N/A	retrospective one group study, only descriptive statistics
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	lines11-20, page4	Clinical and radiological assessment
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	N/A	retrospective one group study, only descriptive statistics
Bias	9	Describe any efforts to address potential sources of bias	N/A	p study, only descriptive statistics
Study size	10	Explain how the study size was arrived at	N/A	p study, only descriptive statistics
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	N/A	retrospective one group study, only descriptive statistics

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	lines 1-3,page6	statistical analysis
		(b) Describe any methods used to examine subgroups and interactions	lines 1-3,page6	statistical analysis
		(c) Explain how missing data were addressed	N/A	p study, only descript ive statistics
		(d) ***Cohort study***—If applicable, explain how loss to follow-up was addressed ***Case-control study***—If applicable, explain how matching of cases and controls was addressed ***Cross-sectional study***—If applicable, describe analytical methods taking account of sampling strategy	N/A	retrospective one grou p study, only descript ive statistics
		(e) Describe any sensitivity analyses	N/A	p study, only descript ive statistics
Results				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	lines6-12,page 6	results
		(b) Give reasons for non-participation at each stage	N/A	p study, only descript ive statistics
		(c) Consider use of a flow diagram	N/A	p study, only descript ive statistics
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	lines6-12,page 6	results
		(b) Indicate number of participants with missing data for each variable of interest	N/A	p study, only descript ive statistics
		(c) ***Cohort study***—Summarise follow-up time (eg, average and total amount)	lines 11-12,page7	results
Outcome data	15*	***Cohort study***—Report numbers of outcome events or summary measures over time	lines25-30,page6	results
		Case-control study—Report numbers in each exposure category, or summary measures of exposure	N/A	COHORT STUDY
		Cross-sectional study—Report numbers of outcome events or summary measures	N/A	COHORT STUDY
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	N/A	retrospective one grou p study, only descript ive statistics
		(b) Report category boundaries when continuous variables were categorized	N/A	p study, only descript ive statistics
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	N/A	p study, only descript ive statistics
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	N/A	p study, only descript ive statistics
Discussion				
Key results	18	Summarise key results with reference to study objectives	Lines17-20,page8	discussion
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	lines15-23,page10	limitation

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	line11-14,page10	interpretation
Generalisability	21	Discuss the generalisability (external validity) of the study results	line26-29,page10	generalisability
Other information				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	N/A	no funding

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
