## STROBE Statement—checklist of items that should be included in reports of observational studies

| Section/item | Item No | Recommendation | Reported on Page Number/Line Number | Reported on Section/Paragraph |
|---|---|---|---|---|
| **Title and abstract** | 1 | (a) Indicate the study's design with a commonly used term in the title or the abstract | Page 2/Line 20 | Abstract-Methods |
| | | (b) Provide in the abstract an informative and balanced summary of what was done and what was found | Page 3/Line 36-37 | Abstract-Conclusions |
| **Introduction** | | | | |
| Background/ rationale | 2 | Explain the scientific background and rationale for the investigation being reported | Page 4/Line 47-52 | Introduction/Paragraph 1 |
| Objectives | 3 | State specific objectives, including any prespecified hypotheses | Page 4/Line 54-56 | Introduction/Paragraph 2 |
| **Methods** | | | | |
| Study design | 4 | Present key elements of study design early in the paper | Page 5/Line 71-73 | Methods/Paragraph 4 |
| Setting | 5 | Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection | Page 5/Line 62-63 | Methods/Paragraph 4 |
| Participants | 6 | (a) ***Cohort study***—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up<br>***Case-control study***—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls<br>***Cross-sectional study***—Give the eligibility criteria, and the sources and methods of selection of participants | Page 5/Line 63-71 | Methods/Paragraph 4 |
| | | (b) ***Cohort study***—For matched studies, give matching criteria and number of exposed and unexposed<br>***Case-control study***—For matched studies, give matching criteria and the number of controls per case | N/A | This study is a prospective cross-sectional study. |
| Variables | 7 | Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable | Page 5/Line 71-73 | Methods/Paragraph 4 |
| Data sources/ measurement | 8* | For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group | Page 6-7/Line 77-98 | Methods/Paragraph 5-6 |
| Bias | 9 | Describe any efforts to address potential sources of bias | Page 6/Line 78-79 | Methods/Paragraph 5 |
| Study size | 10 | Explain how the study size was arrived at | Page 7/Line 100-102 | Methods/Paragraph 7 |
| Quantitative variables | 11 | Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why | Page 7-8/Line 104-114 | Methods/Paragraph 8 |

| | | | | |
|---|---|---|---|---|
| Statistical methods | 12 | (a) Describe all statistical methods, including those used to control for confounding | Page 7-8/Line 104-114 | Methods/Paragraph 8 |
| | | (b) Describe any methods used to examine subgroups and interactions | Page 8/Line 107-108 | Methods/Paragraph 8 |
| | | (c) Explain how missing data were addressed | Page 5/Line 67-71 | Methods/Paragraph 4 |
| | | (d) ***Cohort study***—If applicable, explain how loss to follow-up was addressed<br>***Case-control study***—If applicable, explain how matching of cases and controls was addressed<br>***Cross-sectional study***—If applicable, describe analytical methods taking account of sampling strategy | Page 6-7/Line 77-94 | Methods/Paragraph 5-6 |
| | | (e) Describe any sensitivity analyses | N/A | In this study, we did not |
| **Results** | | | | |
| Participants | 13* | (a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed | N/A | The number of patients eligible for this study in |
| | | (b) Give reasons for non-participation at each stage | N/A | The patients initially |
| | | (c) Consider use of a flow diagram | N/A | The fiow diagram of this |
| Descriptive data | 14* | (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders | Page 8/Line 117-120 | Results/Paragraph 9 |
| | | (b) Indicate number of participants with missing data for each variable of interest | N/A | The data of the patients |
| | | (c) ***Cohort study***—Summarise follow-up time (eg, average and total amount) | N/A | This was a prospective |
| Outcome data | 15* | ***Cohort study***—Report numbers of outcome events or summary measures over time | N/A | This was a prospective |
| | | ***Case-control study***—Report numbers in each exposure category, or summary measures of exposure | N/A | This was a prospective |
| | | ***Cross-sectional study***—Report numbers of outcome events or summary measures | Page 9-10/Line 121-140 | Results/Paragraph 10-11 |
| Main results | 16 | (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included | Page 9-10/Line 130-140 | Results/Paragraph 11 |
| | | (b) Report category boundaries when continuous variables were categorized | N/A | The study did not have |
| | | (c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period | N/A | No relative risk analysi |
| Other analyses | 17 | Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses | Page 10/Line 142 | Results/Paragraph 12 |
| **Discussion** | | | | |
| Key results | 18 | Summarise key results with reference to study objectives | Page 10/Line 144-147 | Discussion/Paragraph 13 |
| Limitations | 19 | Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias | Page 12/Line 170-172 | Discussion/Paragraph 17 |

| | | | | |
|---|---|---|---|---|
| Interpretation | 20 | Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence | Page 10-12/Line 148-169 | Discussion/Paragraph 14-16 |
| Generalisability | 21 | Discuss the generalisability (external validity) of the study results | Page 12/Line 168-169 | Conclusion/Paragraph 16 |
| **Other information** | | | | |
| Funding | 22 | Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based | Page 13/Line 185-188 | Funding/Paragraph 19 |

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

**Note:** An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
