STROBE Statement—checklist of items that should be included in reports of observational studies

Section/item	Item No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Page1/Line3-6;	Title/Running title
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Page2/Line 34-59	Abstract
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Page3/Line 69-103	Introduction/Paragraph 1-3
Objectives	3	State specific objectives, including any prespecified hypotheses	Page4/Line 104-110	Introduction/Paragraph 4
Methods				
Study design	4	Present key elements of study design early in the paper	Page4/Line 115-133	Methods/The sources of
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page4/Line 115-133	Methods/The sources of the patients and the
Participants	6	(a) ***Cohort study***—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up ***Case-control study***—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls ***Cross-sectional study***—Give the eligibility criteria, and the sources and methods of selection of participants	Page4/Line 118-125	Methods/The sources of the patients and the inclusion criteria
		(b) ***Cohort study***—For matched studies, give matching criteria and number of exposed and unexposed ***Case-control study***—For matched studies, give matching criteria and the number of controls per case	Page4/Line 125-129; Page6/Line 198-200	Methods/The sources of the patients and the
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Page5/Line 135-158	Methods/Treatment-Endostar
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Page4/Line 118-125; Page5-6/Line 160-177	Methods/The sources of the patients and the
Bias	9	Describe any efforts to address potential sources of bias	Page4/Line 125-129	Methods/The sources of
Study size	10	Explain how the study size was arrived at	Page4/Line 115-125	Methods/The sources of
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Page4/Line 124-129	Methods/The sources of the patients and the

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	Page5-6/Line 162-177	Methods/Statistical
		(b) Describe any methods used to examine subgroups and interactions	Page5-6/Line 162-177	Methods/Statistical
		(c) Explain how missing data were addressed	Page5-6/Line 162-177	Methods/Statistical
		(d) ***Cohort study***—If applicable, explain how loss to follow-up was addressed ***Case-control study***—If applicable, explain how matching of cases and controls was addressed ***Cross-sectional study***—If applicable, describe analytical methods taking account of sampling strategy	Page5-6/Line 162-177	Methods/Statistical analysis
		(e) Describe any sensitivity analyses	Page5-6/Line 162-177	Methods/Statistical
Results				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Page6/Line 183-191	Results/The comparison of case baseline
		(b) Give reasons for non-participation at each stage	Page6/Line 183-191	Results/The comparison of
		(c) Consider use of a flow diagram	Page18/Line 566-569	Figures
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	Page6/Line 186-198	Results/The comparison of case baseline
		(b) Indicate number of participants with missing data for each variable of interest	Page6/Line 186-198	Results/The comparison of
		(c) ***Cohort study***—Summarise follow-up time (eg, average and total amount)	Page7/Line 205-207	Results/Survival analysis
Outcome data	15*	***Cohort study***—Report numbers of outcome events or summary measures over time	Page7/Line 205-209	Results/Survival analysis
		Case-control study—Report numbers in each exposure category, or summary measures of exposure	N/A	N/A
		Cross-sectional study—Report numbers of outcome events or summary measures	N/A	N/A
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Page7/Line 205-218	Results/Survival analysis
		(b) Report category boundaries when continuous variables were categorized	Page7/Line 209-218	Results/Survival analysis
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	Page7/Line 209-218	Results/Survival analysis
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	Page7-8/Line 222-232	Results/Late-stage adverse
Discussion				
Key results	18	Summarise key results with reference to study objectives	Page7-8/Line 235-245	Discussion/Paragraph 1
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	Page12/Line 388-397	Discussion/Last paragraph

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Page8-9/Line 246-289	Discussion/Paragraph 2-4
Generalisability	21	Discuss the generalisability (external validity) of the study results	Page9-12/Line 290-387	Discussion/Paragraph 5-7
Other information				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	Page13/Line411	Funding

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
