STROBE Statement—checklist of items that should be included in reports of observational studies

Section/item	Item No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	100	Abstract - retrospective
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	94-114	Abstract
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	140-160	Introduction paragraph 1-2
Objectives	3	State specific objectives, including any prespecified hypotheses	162-170	Introduction paragraph 3
Methods				
Study design	4	Present key elements of study design early in the paper	100, 175	Abstract and Material and
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	174-191	Material and Methods paragraph 1
Participants	6	(a) ***Cohort study***—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up ***Case-control study***—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls ***Cross-sectional study***—Give the eligibility criteria, and the sources and methods of selection of participants	Cross-sectional study 174-185	Material and Methods paragraph 1
		(b) ***Cohort study***—For matched studies, give matching criteria and number of exposed and unexposed ***Case-control study***—For matched studies, give matching criteria and the number of controls per case	Not applicable	Not applicable
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	177, 237-252	Material and Methods paragraph 1 and 6
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	177-181, 204-252	Material and Methods paragraph 1 and 4-6
Bias	9	Describe any efforts to address potential sources of bias	185-188, 193-197	Material and Methods
Study size	10	Explain how the study size was arrived at	193-197	Material and Methods
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	198-202	Material and Methods paragraph 2

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	255-261	Material and Methods
		(b) Describe any methods used to examine subgroups and interactions	255-261	Material and Methods
		(c) Explain how missing data were addressed	Not applicable	Not applicable
		(d) ***Cohort study***—If applicable, explain how loss to follow-up was addressed ***Case-control study***—If applicable, explain how matching of cases and controls was addressed ***Cross-sectional study***—If applicable, describe analytical methods taking account of sampling strategy	Not applicable	Not applicable
		(e) Describe any sensitivity analyses	Not performed	Not performed
Results				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	265-267 174-202	Results paragraph 1 Material and Methods
		(b) Give reasons for non-participation at each stage	Not applicable;	Not applicable
		(c) Consider use of a flow diagram	195; Figure 1A	Material and Methods
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	265-266 (Table 1)	Results paragraph 1
		(b) Indicate number of participants with missing data for each variable of interest	265-266 (Table 1)	Results paragraph 1
		(c) ***Cohort study***—Summarise follow-up time (eg, average and total amount)	Not applicable	Not applicable
Outcome data	15*	***Cohort study***—Report numbers of outcome events or summary measures over time	N/A	N/A
		Case-control study—Report numbers in each exposure category, or summary measures of exposure	N/A	N/A
		Cross-sectional study—Report numbers of outcome events or summary measures	266-267 (table 2)	Results paragraph 1 and
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	269-288	Results paragraph 2-3
		(b) Report category boundaries when continuous variables were categorized	269-279	Results paragraph 3
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	Not relevant	Not relevant
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	N/A	N/A
Discussion				
Key results	18	Summarise key results with reference to study objectives	292-295	Discussion paragraph 1
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	369-377	Discussion paragraph 8

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	292-267	Discussion paragraph 1-7
Generalisability	21	Discuss the generalisability (external validity) of the study results	295-303, 307-311,	Discussion paragraph 1-3
Other information				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	31-34	Compliance with Ethical Standards / Declarations

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
