STROBE Statement—checklist of items that should be included in reports of observational studies

Section/item	Item No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	page3/ line39-47	abstract/ para1-2
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	page3/ line 48-58	abstract/ para3-4
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	page4-5/ line64-88	introduction/ para1-3
Objectives	3	State specific objectives, including any prespecified hypotheses	page5/ line88-91	introduction/ para3-4
Methods				
Study design	4	Present key elements of study design early in the paper	page5/ line95-103	study design and subject/ para1-2
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	page5/line95-133	study design and subjects/para1-3, definitions and variables/para1-2
Participants	6	(a) ***Cohort study***—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up ***Case-control study***—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls ***Cross-sectional study***—Give the eligibility criteria, and the sources and methods of selection of participants	page5/line95-105	study design and subjects/para1-2
		(b) ***Cohort study***—For matched studies, give matching criteria and number of exposed and unexposed ***Case-control study***—For matched studies, give matching criteria and the number of controls per case	This is not a matched study.	This is not a matched study.
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	page6/ line 115-133	definitions and variables/ para1-2.
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	page6/ line115-133	definitions and variables/ para1-2.
Bias	9	Describe any efforts to address potential sources of bias	page7-8/ line155-167	statistical analysis/ para1.
Study size	10	Explain how the study size was arrived at	page5/ line 95-103	study design and subjects/ para1
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	page7-8/ line155-167	statistical analysis/ para1.

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	page7-8/ line155-167	statistical analysis/ para1.
		(b) Describe any methods used to examine subgroups and interactions	page7-8/line155-167	statistical analysis/ para1.
		(c) Explain how missing data were addressed	page7-8/ line155-167	statistical analysis/ para1.
		(d) ***Cohort study***—If applicable, explain how loss to follow-up was addressed ***Case-control study***—If applicable, explain how matching of cases and controls was addressed ***Cross-sectional study***—If applicable, describe analytical methods taking account of sampling strategy	page7-8/ line155-167	statistical analysis/ para1.
		(e) Describe any sensitivity analyses	page7-8/ line155-167	statistical analysis/ para1.
Results				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	page8/line171-181	baseline characteristics/ para1.
		(b) Give reasons for non-participation at each stage	page8/line171-181	baseline characteristics/ para1.
		(c) Consider use of a flow diagram	page8/line172-173	baseline characteristics/ para1.
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	page8/171-181	baseline characteristics/ para1,2.
		(b) Indicate number of participants with missing data for each variable of interest	page8/171-181	baseline characteristics/ para1,2.
		(c) ***Cohort study***—Summarise follow-up time (eg, average and total amount)	page8/line171-175	baseline characteristics/ para1.
Outcome data	15*	***Cohort study***—Report numbers of outcome events or summary measures over time	page8/line176-181	baseline characteristics/para2.
		Case-control study—Report numbers in each exposure category, or summary measures of exposure	none	none
		Cross-sectional study—Report numbers of outcome events or summary measures	none	none
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	page8-9/line184-196,page9/199-204	risk factor analyses for outcomes /para1-3. freedom from overall mortality and MACCE between groups/para1
		(b) Report category boundaries when continuous variables were categorized	page8-9/line184-196, page9/199-204	risk factor analyses for outcomes /para1-3
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	page8-9/line184-196, page9/line 199-204	risk factor analyses for outcomes /para1-3
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	none	none
Discussion				
Key results	18	Summarise key results with reference to study objectives	page9-10/line207-213	discussion/para1
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	page11/line243-255	limitations/para5

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	page10-11/line214-242	discussion/para2-4
Generalisability	21	Discuss the generalisability (external validity) of the study results	page11/line258-261	conclusions/para1
Other information				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	page12/line264-271	ethical statement

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
