RESULTS				
Study selection	16a	Describe the results of the search and selection process, from the number of records identified in the search to the number of studies included in the review, ideally using a flow diagram.	Figure 1	Results
	16b	Cite studies that met many but not all inclusion criteria ('near-misses') and explain why they were excluded.	Table 1	Results
Study characteristics	17	Cite each included study and present its characteristics.	Table 1	Results
Risk of bias in studies	18	Present assessments of risk of bias for each included study.	Page 8/Line 180-182 Supplemental Table 1	Results/Supplemental/Paragraph 1
Results of individual studies	19	For all outcomes, present, for each study: (a) summary statistics for each group (where appropriate) and (b) an effect estimate and its precision (e.g. confidence/credible interval), ideally using structured tables or plots.	Table 1	Results

Results of syntheses	20a	For each synthesis, briefly summarise the characteristics and risk of bias among contributing studies.	Figure 3 - Figure 5	Results
	20b	Present results of all statistical syntheses conducted. If meta-analysis was done, present for each the summary estimate and its precision (e.g. confidence/credible interval) and measures of statistical heterogeneity. If comparing groups, describe the direction of the effect.	Figure 2 - Figure 5	Results
	20c	Present results of all investigations of possible causes of heterogeneity among study results.	Page 9/Line 203-205	Results/Paragraph 2
	20d	Present results of all sensitivity analyses conducted to assess the robustness of the synthesized results.	Page 9/Line 203-205	Results/Paragraph 2
Reporting biases	21	Present assessments of risk of bias due to missing results (arising from reporting biases) for each synthesis assessed.	Figure 6	Results
Certainty of evidence	22	Present assessments of certainty (or confidence) in the body of evidence for each outcome assessed.	Figure 6	Results
