STROBE Statement—checklist of items that should be included in reports of observational studies

Section/item	Item No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Pg.4 /Line no. 68-70	Abstract/para2
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Pg. 4/ line no. 73-80	Abstract/para3-4
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Pg.5/Line no. 112-114	Introduction/para2
Objectives	3	State specific objectives, including any prespecified hypotheses	Pg.6/Line no. 132-134	Introduction/para5
Methods				
Study design	4	Present key elements of study design early in the paper	Pg.6/Line no. 139-140	Method/para1
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	N/A	The study was observesional,
Participants	6	(a) ***Cohort study***—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up ***Case-control study***—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls ***Cross-sectional study***—Give the eligibility criteria, and the sources and methods of selection of participants	Pg.6/Line no. 149-154	Method/para2
		(b) ***Cohort study***—For matched studies, give matching criteria and number of exposed and unexposed ***Case-control study***—For matched studies, give matching criteria and the number of controls per case	N/A	Not a matched study
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	N/A	The study was observational
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Pg.7/Line no.171-182	Method/para5
Bias	9	Describe any efforts to address potential sources of bias	Pg.13/Line no. 354-357	Study limitations/para1
Study size	10	Explain how the study size was arrived at	Pg.8/Line no. 190-193	Method/para7
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Pg.7/Line no. 194-197	Method/para7

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	Pg.7/Line no. 193-197	Method/para7
		(b) Describe any methods used to examine subgroups and interactions	Pg.8/Line no. 202-207	Method/para8
		(c) Explain how missing data were addressed	Pg.10/Line no. 270-273	Results/para11
		(d) ***Cohort study***—If applicable, explain how loss to follow-up was addressed ***Case-control study***—If applicable, explain how matching of cases and controls was addressed ***Cross-sectional study***—If applicable, describe analytical methods taking account of sampling strategy	Pg.12/Line no. 355-357	Study limitations/para1
		(e) Describe any sensitivity analyses	N/A	The study was
Results				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Pg.8-9/Line no. 211-219	Results/para1
		(b) Give reasons for non-participation at each stage	Pg.8/Line no. 211-213	Results/para1
		(c) Consider use of a flow diagram	N/A	N/A
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	Pg.8-9/Line no. 213-219	Results/para1
		(b) Indicate number of participants with missing data for each variable of interest	Pg.10/Line no. 271-273	Results/para9
		(c) ***Cohort study***—Summarise follow-up time (eg, average and total amount)	N/A	The study was
Outcome data	15*	***Cohort study***—Report numbers of outcome events or summary measures over time	Pg.8/Line no. 211-219	Results/para1
		Case-control study—Report numbers in each exposure category, or summary measures of exposure	N/A	The study was
		Cross-sectional study—Report numbers of outcome events or summary measures	N/A	The study was
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	N/A	No data was adjusted
		(b) Report category boundaries when continuous variables were categorized	Pg.8/Line no. 213-216	Results/para1
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	N/A	Risk factors were not
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	N/A	N/A
Discussion				
Key results	18	Summarise key results with reference to study objectives	Pg.11/Line no. 289-291	Discussion/para1
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	Pg.13/Line no. 353-357	Study limitations/para1

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Pg.13-14/Line no. 372-381	Conclusion/para1
Generalisability	21	Discuss the generalisability (external validity) of the study results	Pg.13-14/Line no. 379-381	Conclusion/para1
Other information				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	Pg.15/Line no. 391-394	Funding/para1

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
