Section/item	ltem No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Page 2/Line 36-40	Abstract/Paragraph 2
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Page 2/Line 36-48	Abstract/Paragraph 2-4
Introduction			·	
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Page 2-3/Line 58-92	Introduction/Paragraph 1
Objectives	3	State specific objectives, including any prespecified hypotheses	Page 3/Line 92-95	Introduction/Paragraph 1
Methods				
Study design	4	Present key elements of study design early in the paper	Page 4/Line 105-106	Methods/Paragraph 1
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page 3-4/Line 100-102	Methods/Paragraph 1
Participants	6	 (a) Cohort study – Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study – Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study – Give the eligibility criteria, and the sources and methods of selection of participants 	Page 4/Line 102-104	Methods/Paragraph 1
		(b) Cohort study —For matched studies, give matching criteria and number of exposed and unexposed Case-control study —For matched studies, give matching criteria and the number of controls per case	N/A	N/A
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Page 5/Line 138-162	Methods/Paragraph 3
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Page 5-6/Line 164-171	Methods/Paragraph 4
Bias	9	Describe any efforts to address potential sources of bias	Page 5-6/Line	Methods/Paragraph 4-5
Study size	10	Explain how the study size was arrived at	Page 6/Line 190-193	Methods/Paragraph 6
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Page 6/Line 193-196	Methods/Paragraph 6

STROBE Statement-checklist of items that should be included in reports of observational studies

12	(a) Describe all statistical methods, including those used to control for confounding	Page 6/Line 175-196	Methods/Paragraph 6
	(b) Describe any methods used to examine subgroups and interactions	Page 6/Line 179-181	Methods/Paragraph 6
	(c) Explain how missing data were addressed	N/A	N/A
	(d) Cohort study —If applicable, explain how loss to follow-up was addressed Case-control study —If applicable, explain how matching of cases and controls was addressed Cross-sectional study —If applicable, describe analytical methods taking account of sampling strategy	Page 5/Line 138-162	Methods/Paragraph 3
	(e) Describe any sensitivity analyses	N/A	N/A
13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Page 6-7/Line 199-217	Results/Paragraph 1-2
	(b) Give reasons for non-participation at each stage	N/A	N/A
	(c) Consider use of a flow diagram	N/A	N/A
14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	N/A	N/A
	(b) Indicate number of participants with missing data for each variable of interest	N/A	N/A
	(c) Cohort study -Summarise follow-up time (eg, average and total amount)	N/A	N/A
15*	Cohort study – Report numbers of outcome events or summary measures over time	N/A	N/A
	Case-control study – Report numbers in each exposure category, or summary measures of exposure	N/A	N/A
	Cross-sectional study – Report numbers of outcome events or summary measures	N/A	N/A
16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Page 7/Line 219-232	Results/Paragraph 3
	(b) Report category boundaries when continuous variables were categorized	Page 7-8/Line 234-242	Results/Paragraph 4
	(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	N/A	N/A
17	Report other analyses done – eg analyses of subgroups and interactions, and sensitivity analyses	Page 8/Line 244-262	Results/Paragraph 5
18	Summarise key results with reference to study objectives	Page 8/Line 266-269	Discussion/Paragraph 1
19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction	Page 11/Line 359-369	Limitations/Paragraph
	13* 14* 15* 16 17 18	13* (a) Bescribe any methods used to examine subgroups and interactions (b) Describe any methods used to examine subgroups and interactions (c) Explain how missing data were addressed (d) Cohort study—If applicable, explain how loss to follow-up was addressed Case-control study—If applicable, explain how matching of cases and controls was addressed Cross-sectional study—If applicable, explain how matching of cases and controls was addressed (a) Report numbers of individ/àlsta each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed (b) Give reasons for non-participation at each stage (c) Consider use of a flow diagram 14* (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders (b) Indicate number of participants with missing data for each variable of interest (c) Cohort study—Report numbers of outcome events or summary measures over time Case-control study—Report numbers of outcome events or summary measures 16 (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included (c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period (f) Report other	(b) Describe any methods used to examine subgroups and interactions Page 61Line 179-181 (c) Describe any methods used to examine subgroups and interactions N/A (d) Cohort study—If applicable, explain how loss to follow-up was addressed N/A (d) Cohort study—If applicable, explain how matching of cases and controls was addressed Page 50Line 138-162 Case-control study—If applicable, explain how matching of cases and controls was addressed Page 50Line 138-162 (e) Describe any sensitivity analyses N/A 13* (a) Report numbers of individ\bbsd at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed N/A (b) Give reasons for non-participation at each stage N/A (c) Consider use of a flow diagram N/A 14* (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders N/A (b) Indicate number of participants with missing data for each variable of interest N/A (c) Cohort study—Report numbers of outcome events or summary measures over time N/A 15* Cohort study—Report numbers of outcome events or summary measures N/A 16 (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence int

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Page 11-12/Line 371-378	Conclusions/Paragraph 1			
Generalisability	21	Discuss the generalisability (external validity) of the study results	Page 10/Line 307-324	Conclusions/Paragraph 3			
Other information							
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	Page 12/Line 385-386	Acknowledgments/Paragra ph2			

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
