

## STROBE Statement—checklist of items that should be included in reports of observational studies

Section/item	Item No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	page 2 line 35-64	title and abstract
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	page 2 line 35-64	title and abstract
<b>Introduction</b>				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	page 3,4 line 70-112	introduction paragraph 1-3
Objectives	3	State specific objectives, including any prespecified hypotheses	page 4 line 113-119	introduction paragraph 4
<b>Methods</b>				
Study design	4	Present key elements of study design early in the paper	page 4 line 125-129	methods paragraph 1
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	page 4 line 125-129	methods paragraph 1
Participants	6	(a) <b>Cohort study</b> —Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up <b>Case-control study</b> —Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls <b>Cross-sectional study</b> —Give the eligibility criteria, and the sources and methods of selection of participants	page 4,5 line 129-147	methods paragraph 1
		(b) <b>Cohort study</b> —For matched studies, give matching criteria and number of exposed and unexposed <b>Case-control study</b> —For matched studies, give matching criteria and the number of controls per case	N/A: not matched studies	N/A: not matched studies
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	page 6 line 194-196	methods paragraph 9
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	page 6 line 194-196	methods paragraph 9
Bias	9	Describe any efforts to address potential sources of bias	page 6 line 194-196	methods paragraph 9
Study size	10	Explain how the study size was arrived at	page 6 line 194-196	methods paragraph 9
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	page 6 line 194-196	methods paragraph 9

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	page 6 line 197-203	methods paragraph 10
		(b) Describe any methods used to examine subgroups and interactions	page 6 line 197-203	methods paragraph 10
		(c) Explain how missing data were addressed	page 6 line 197-203	methods paragraph 10
		(d) <b>Cohort study</b> —If applicable, explain how loss to follow-up was addressed <b>Case-control study</b> —If applicable, explain how matching of cases and controls was addressed <b>Cross-sectional study</b> —If applicable, describe analytical methods taking account of sampling strategy	page 6 line 197-203	methods paragraph 10
		(e) Describe any sensitivity analyses	page 6 line 197-203	methods paragraph 10
<b>Results</b>				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	page 7 line 208-213	results paragraph 1
		(b) Give reasons for non-participation at each stage	page 7 line 214-218	results paragraph 2
		(c) Consider use of a flow diagram	page 7 line 219-225	results paragraph 3
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	page 16 line 524-527	table 1
		(b) Indicate number of participants with missing data for each variable of interest	page 16 line 524-527	table 1
		(c) <b>Cohort study</b> —Summarise follow-up time (eg, average and total amount)	page 16 line 524-527	table 1
Outcome data	15*	<b>Cohort study</b> —Report numbers of outcome events or summary measures over time		
		<b>Case-control study</b> —Report numbers in each exposure category, or summary measures of exposure	N/A not case-control study	N/A not case-control study
		<b>Cross-sectional study</b> —Report numbers of outcome events or summary measures	N/A not cross-sectional	N/A not cross-sectional
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	page 7 line 235-243	results paragraph 5
		(b) Report category boundaries when continuous variables were categorized	page 8 line 244-248	results paragraph 6
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	page 8 line 249-254	results paragraph 7
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	page 8 line 249-254	results paragraph 7
<b>Discussion</b>				
Key results	18	Summarise key results with reference to study objectives	page 8 line 257-304	discussion paragraph 1-4
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	page 10 line 335-352	discussion paragraph 8.9

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	page 9,10 line 305-327	discussion paragraph 5,6
Generalisability	21	Discuss the generalisability (external validity) of the study results	page 11 line 353-354	discussion paragraph 10
<b>Other information</b>				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	page 1 line 30,31	title page

\*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

**Note:** An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at <http://www.plosmedicine.org/>, Annals of Internal Medicine at <http://www.annals.org/>, and Epidemiology at <http://www.epidem.com/>). Information on the STROBE Initiative is available at [www.strobe-statement.org](http://www.strobe-statement.org).
