

PRISMA 2009 Checklist

Section/topic	Item No	Checklist item	Reported on Page Number/Line Number	Reported on Section/Paragraph
TITLE				
Title	1	Identify the report as a systematic review, meta-analysis, or both.	Page1/Line1-3	Title/Paragraph1
ABSTRACT				
Structured summary	2	Provide a structured summary including, as applicable: background; objectives; data sources; study eligibility criteria, participants, and interventions; study appraisal and synthesis methods; results; limitations; conclusions and implications of key findings; systematic review registration number.	Page3/Line12-Page3/Line19	Abstract/Paragraph1-4
INTRODUCTION				
Rationale	3	Describe the rationale for the review in the context of what is already known.	Page5/Line5-Page6/12	Introduction/Paragraph1-3
Objectives	4	Provide an explicit statement of questions being addressed with reference to participants, interventions, comparisons, outcomes, and study design (PICOS).	Page5/Line13-15	Introduction/Paragraph4
METHODS				
Protocol and registration	5	Indicate if a review protocol exists, if and where it can be accessed (e.g., Web address), and, if available, provide registration information including registration number.	Page7/Line11-14	Methods/Paragraph2
Eligibility criteria	6	Specify study characteristics (e.g., PICOS, length of follow-up) and report characteristics (e.g., years considered, language, publication status) used as criteria for eligibility, giving rationale.	Page7/Line15-18	Methods/Paragraph3
Information sources	7	Describe all information sources (e.g., databases with dates of coverage, contact with study authors to identify additional studies) in the search and date last searched.	Page6/Line18-Page7/Line8	Methods/Paragraph1
Search	8	Present full electronic search strategy for at least one database, including any limits used, such that it could be repeated.	Page6/Line19-Page7/Line3	Methods/Paragraph1
Study selection	9	State the process for selecting studies (i.e., screening, eligibility, included in systematic review, and, if applicable, included in the meta-analysis).	Page7/Line11-18	Methods/Paragraph2,3
Data collection process	10	Describe method of data extraction from reports (e.g., piloted forms, independently, in duplicate) and any processes for obtaining and confirming data from investigators.	Page7/Line20-Page8/Line12	Methods/Paragraph4-5
Data items	11	List and define all variables for which data were sought (e.g., PICOS, funding sources) and any assumptions and simplifications made.	Page8/Line7-12	Methods/Paragraph4

Risk of bias in individual studies	12	Describe methods used for assessing risk of bias of individual studies (including specification of whether this was done at the study or outcome level), and how this information is to be used in any data synthesis.	Page8/Line13-18	Methods/Paragraph6
Summary measures	13	State the principal summary measures (e.g., risk ratio, difference in means).	Page8/Line13-18	Methods/Paragraph6
Synthesis of results	14	Describe the methods of handling data and combining results of studies, if done, including measures of consistency (e.g., I ²) for each meta-analysis.	Page8/Line13-18	Methods/Paragraph6
Risk of bias across studies	15	Specify any assessment of risk of bias that may affect the cumulative evidence (e.g., publication bias, selective reporting within studies).	Page8/Line13-18	Methods/Paragraph6
Additional analyses	16	Describe methods of additional analyses (e.g., sensitivity or subgroup analyses, meta-regression), if done, indicating which were pre-specified.	Page8/Line13-18	Methods/Paragraph6
RESULTS				
Study selection	17	Give numbers of studies screened, assessed for eligibility, and included in the review, with reasons for exclusions at each stage, ideally with a flow diagram.	Page8/Line20-Page9/Line5	Results/Paragraph1
Study characteristics	18	For each study, present characteristics for which data were extracted (e.g., study size, PICOS, follow-up period) and provide the citations.	Page9/Line18-Page10/Line4	Results/Paragraph3
Risk of bias within studies	19	Present data on risk of bias of each study and, if available, any outcome level assessment (see item 12).	Page9/Line7-16	Results/Paragraph2
Results of individual studies	20	For all outcomes considered (benefits or harms), present, for each study: (a) simple summary data for each intervention group (b) effect estimates and confidence intervals, ideally with a forest plot.	Page10/Line6-Page11/Line16	Results/Paragraph4-7
Synthesis of results	21	Present results of each meta-analysis done, including confidence intervals and measures of consistency.	Page10/Line6-Page11/Line16	Results/Paragraph4-7
Risk of bias across studies	22	Present results of any assessment of risk of bias across studies (see Item 15).	Page9/Line7-16	Results/Paragraph2
Additional analysis	23	Give results of additional analyses, if done (e.g., sensitivity or subgroup analyses, meta-regression [see Item 16]).	N/A	N/A
DISCUSSION				
Summary of evidence	24	Summarize the main findings including the strength of evidence for each main outcome; consider their relevance to key groups (e.g., healthcare providers, users, and policy makers).	Page12/Line2-Page14/Line13	Discussion/Paragraph2-7
Limitations	25	Discuss limitations at study and outcome level (e.g., risk of bias), and at review-level (e.g., incomplete retrieval of identified research, reporting bias).	Page14/Line19-22	Discussion/Paragraph9
Conclusions	26	Provide a general interpretation of the results in the context of other evidence, and implications for future research.	Page15/Line12-16	Discussion/Paragraph11

FUNDING				
Funding	27	Describe sources of funding for the systematic review and other support (e.g., supply of data); role of funders for the systematic review.	Page3/Line6-10	Funding/Paragraph1
