<u>Materials Design Analysis Reporting (MDAR)</u> Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

equivalent committee(s), provide reference number

Provide statement confirming informed consent

Report on age and sex for all study participants.

obtained from study participants.

for approval.

Materials

Antibodies	Yes (indicate where provided:	n/a
For commercial reagents, provide supplier	Yes, see table one.	
name, catalogue number and RRID, if available.		
Cell materials	Yes (indicate where provided:	n/a
Cell lines: Provide species information, strain.		Not use cell lines
Provide accession number in repository OR		
supplier name, catalog number, clone number,		
OR RRID		
Primary cultures: Provide species, strain, sex of		Not use Primary cultures
origin, genetic modification status.		
Experimental animals	Yes (indicate where provided:	n/a
Laboratory animals: Provide species, strain, sex, age,	(manage programme)	Not use animals
genetic modification status. Provide accession		
number in repository OR supplier name, catalog		
number, clone number, OR RRID		
Animal observed in or captured from the		Not use animals
field: Provide species, sex and age where		
possible		
Model organisms: Provide Accession number		Not use animals
in repository (where relevant) OR RRID		
Plants and microbes	Yes (indicate where provided:	n/a
Plants: provide species and strain, unique accession		Not use Plants
number if available, and source (including location		
for collected wild specimens)		
Microbes: provide species and strain, unique		Not Microbes
accession number if available, and source		
Human research participants	Yes (indicate where provided:	n/a
Identify authority granting ethics approval (IRB or	Yes, see page 9-10	-

Yes, see page 9-10

Yes, see table 2.

Design

Study protocol	Yes (indicate where provided:	n/a
For clinical trials, provide the trial registration	Tee (mareate timere prestateat	No use
number OR cite DOI in manuscript.		No use
number en eite ber in manascripe.		
Laboratory protocol	Yes (indicate where provided:	n/a
Provide DOI or other citation details if detailed step-	Yes, see page 4 -5.	
by-step protocols are available.		
Experimental study design (statistics details)	Yes (indicate where provided:	n/a
State whether and how the following have been		
done , or if they were not carried out.		
Sample size determination		No use
Randomisation		No use
Blinding		No use
Inclusion/exclusion criteria	Yes, see page 4 -5.	
Sample definition and in-laboratory replication	Yes (indicate where provided:	n/a
State number of times the experiment was		No use
replicated in laboratory		
Define whether data describe technical or biological		No use
replicates		
Ethics	Yes (indicate where provided:	n/a
Studies involving human participants: State details of	Yes, see page 9-10	
authority granting ethics approval (IRB or equivalent		
committee(s), provide reference number for		
approval.		
Studies involving experimental animals: State details		Not use animals
equivalent committee(s), provide reference number		
equivalent committee(s), provide reference number for approval.		
equivalent committee(s), provide reference number for approval.	Yes, see page 9-10	
equivalent committee(s), provide reference number for approval. Studies involving specimen and field samples: State if relevant permits obtained, provide details of	Yes, see page 9-10	
of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval. Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required,	Yes, see page 9-10	
equivalent committee(s), provide reference number for approval. Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required,	Yes, see page 9-10	
equivalent committee(s), provide reference number for approval. Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.		n/a
equivalent committee(s), provide reference number for approval. Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why. Dual Use Research of Concern (DURC)	Yes, see page 9-10 Yes (indicate where provided:	n/a No use
equivalent committee(s), provide reference number for approval. Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.		n/a No use

Analysis

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is	Yes, see page 4 -5.	
excluded, and whether the criteria for exclusion were		
determined and specified in advance.		

Statistics	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of	Yes, see page 4 -5.	
tests.		ı

Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available,	Yes, see page 4 -5.	
including protocols for access or restriction on		
access.		
If data are publicly available, provide accession		No use
number in repository or DOI or URL.		
If publicly available data are reused, provide		No use
accession number in repository or DOI or URL, where		
possible.		

Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential		
for replicating the main findings of the study:		
State whether the code or software is available.		No use
If code is publicly available, provide accession number in repository, or DOI or URL.		No use

Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.	ICMJE guidelines were followed, as the journal follows ICMJE recommendations for publication.
