

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/atm-20-7041	
Item	Question	Authors' Response (place “-” if not applicable)
1	Would you like to share data collected for your study to others?	No.
2	If not, would you like to share the reason for your decision?	Some of the clinical data concerns patient privacy. And we are now performing further experiments to clarify the direct role of CysC and certain receptors in cardiac hypertrophy, so we would like to share the data we have until these experiments finished.
3	What data in particular will be shared?	-
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Yes. Study protocol and statistical analysis plan will be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date.
7	To whom will you share the data?	Cardiologists who are interested in studies of Hypertension and cardiac hypertrophy.
8	For what type of analysis or purpose?	For analysis to study the mechanism of myocardial hypertrophy.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: shimyee@vip.163.com.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
