Abstract: This article reviews the related research on the application of traditional Chinese medicine (TCM) nursing in neurogenic bladder dysfunction, such as acupuncture therapy, diet nursing, emotional nursing, bladder function training. In order to fully understand the effect of TCM nursing on neurogenic bladder dysfunction, the theoretical

basis of traditional Chinese medicine of the disease is expounded at the same time. The Feature and the Advantage of TCM must be exerted by exploring suitable TCM nursing plan for patients with neurogenic bladder dysfunction. The studies in this review provide reference for targeted application of TCM nursing in patients with neurogenic bladder dysfunction and promote the further improvement of TCM clinical efficacy of neurogenic bladder dysfunction.
