

## PRISMA 2009 Checklist

Section/topic	Item No	Checklist item	Reported on Page Number/Line Number	Reported on Section/Paragraph
<b>TITLE</b>				
Title	1	Identify the report as a systematic review, meta-analysis, or both.	page 1 / line 1 to 2	Title /Paragraph 1
<b>ABSTRACT</b>				
Structured summary	2	Provide a structured summary including, as applicable: background; objectives; data sources; study eligibility criteria, participants, and interventions; study appraisal and synthesis methods; results; limitations; conclusions and implications of key findings; systematic review registration number.	page 2/ line 28 to 49	Abstract/Paragraph 1 to 4
<b>INTRODUCTION</b>				
Rationale	3	Describe the rationale for the review in the context of what is already known.	page 3/ line 52 to 87	Introduction/Paragraph 1
Objectives	4	Provide an explicit statement of questions being addressed with reference to participants, interventions, comparisons, outcomes, and study design (PICOS).	page 4/ line 87 to 91	Introduction/Paragraph 1 to 2
<b>METHODS</b>				
Protocol and registration	5	Indicate if a review protocol exists, if and where it can be accessed (e.g., Web address), and, if available, provide registration information including registration number.	page 4/ line 92 to 95	Methods/Paragraph 1
Eligibility criteria	6	Specify study characteristics (e.g., PICOS, length of follow-up) and report characteristics (e.g., years considered, language, publication status) used as criteria for eligibility, giving rationale.	page 5/line 103 to 123	Methods/Paragraph 2 to 3
Information sources	7	Describe all information sources (e.g., databases with dates of coverage, contact with study authors to identify additional studies) in the search and date last searched.	page 4 / line 95 to 102	Methods/Paragraph 1
Search	8	Present full electronic search strategy for at least one database, including any limits used, such that it could be repeated.	page 4/ line 95 to 102	Methods/Paragraph 1
Study selection	9	State the process for selecting studies (i.e., screening, eligibility, included in systematic review, and, if applicable, included in the meta-analysis).	page 4/ line 95 to 102	Methods/Paragraph 1
Data collection process	10	Describe method of data extraction from reports (e.g., piloted forms, independently, in duplicate) and any processes for obtaining and confirming data from investigators.	page 5/ line 124 to 130	Methods/Paragraph 4
Data items	11	List and define all variables for which data were sought (e.g., PICOS, funding sources) and any assumptions and simplifications made.	page 5/ line 125 to 130	Methods/Paragraph 4

Risk of bias in individual studies	12	Describe methods used for assessing risk of bias of individual studies (including specification of whether this was done at the study or outcome level), and how this information is to be used in any data synthesis.	page 6/ line 144 to 148	Methods/Paragraph 7
Summary measures	13	State the principal summary measures (e.g., risk ratio, difference in means).	page 5/ line 132 to 143	Methods/Paragraph 6
Synthesis of results	14	Describe the methods of handling data and combining results of studies, if done, including measures of consistency (e.g., I <sup>2</sup> ) for each meta-analysis.	page 5,6/ line 132 to 143	Methods/Paragraph 6 to 7
Risk of bias across studies	15	Specify any assessment of risk of bias that may affect the cumulative evidence (e.g., publication bias, selective reporting within studies).	page 6/ line 144 to 148	Methods/Paragraph 7
Additional analyses	16	Describe methods of additional analyses (e.g., sensitivity or subgroup analyses, meta-regression), if done, indicating which were pre-specified.	page 6/ line 132 to 143	Methods/Paragraph 6
<b>RESULTS</b>				
Study selection	17	Give numbers of studies screened, assessed for eligibility, and included in the review, with reasons for exclusions at each stage, ideally with a flow diagram.	page 6/ line 152 to 154	Result/Paragraph 1
Study characteristics	18	For each study, present characteristics for which data were extracted (e.g., study size, PICOS, follow-up period) and provide the citations.	page 6/ line 155 to 173	Result/Paragraph 2
Risk of bias within studies	19	Present data on risk of bias of each study and, if available, any outcome level assessment (see item 12).	page 8/ line 222 to 229	Result/Paragraph 9
Results of individual studies	20	For all outcomes considered (benefits or harms), present, for each study: (a) simple summary data for each intervention group (b) effect estimates and confidence intervals, ideally with a forest plot.	page 8/ line 202	Result/Paragraph 4 to 8
Synthesis of results	21	Present results of each meta-analysis done, including confidence intervals and measures of consistency.	page 7/ line 174	Result/Paragraph 4 to 8
Risk of bias across studies	22	Present results of any assessment of risk of bias across studies (see Item 15).	page 8/ line 222 to 229	Result/Paragraph 9
Additional analysis	23	Give results of additional analyses, if done (e.g., sensitivity or subgroup analyses, meta-regression [see Item 16]).	page 8/ line 202	Result/Paragraph 4 to 8
<b>DISCUSSION</b>				
Summary of evidence	24	Summarize the main findings including the strength of evidence for each main outcome; consider their relevance to key groups (e.g., healthcare providers, users, and policy makers).	page 9/ line 232	Discussion/Paragraph 1
Limitations	25	Discuss limitations at study and outcome level (e.g., risk of bias), and at review-level (e.g., incomplete retrieval of identified research, reporting bias).	page 11/ line 293 to 301	Discussion/Paragraph 8
Conclusions	26	Provide a general interpretation of the results in the context of other evidence, and implications for future research.	page 11/ line 302 to 304	Discussion/Paragraph 9

FUNDING				
Funding	27	Describe sources of funding for the systematic review and other support (e.g., supply of data); role of funders for the systematic review.	page 12/ line 308	Funding/Paragraph 1
