

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/tcr-20-83	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	We will share the data that the interaction between mesenchymal stem cell (MSC)-derived exosomes (exo) carrying miR-150 and IGF2BP1 in osteosarcoma (OS). We found that the effect of MSC-exo-miR-150 on the development of OS is seldom reported.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol and statistical analysis plan will be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	One year within the publication date, since the technique may be updated over time.
7	To whom will you share the data?	Medical oncologists who are interested in studies of OS.
8	For what type of analysis or purpose?	For analysis to explore the interaction between miRNA (especially miR-150) and IGF2BP1 in OS.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: gaozhenchao1680@163.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
