

Data Sharing Statement

Article Info	available at http://dx.doi.org/10.21037/tcr-19-2121	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The data on spleen preservation in particular will be shared, and we also found that tumor size and surgery group were independent risk factors for SP
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or main date may be updated over time.
7	To whom will you share the data?	Pancreatic surgeons who are interested in minimally invasive pancreatectomy.
8	For what type of analysis or purpose?	For analysis to evaluate the advantage of RDP in spleen preservation for patients with benign and low-grade malignant lesions in the distal pancreas.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: skyrainhe@163.com.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
