

TRIPOD Checklist: Prediction Model Development

Section	Item	Checklist description	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract				
Title	1	Identify the study as developing and/or validating a multivariable prediction model, the target population, and the outcome to be predicted.	Page 1/line 3-5	Title
Abstract	2	Provide a summary of objectives, study design, setting, participants, sample size, predictors, outcome, statistical analysis, results, and conclusions.	Page 1/line 9-37	Abstract/Para1-4
Introduction				
Background and objectives	3a	Explain the medical context (including whether diagnostic or prognostic) and rationale for developing or validating the multivariable prediction model, including references to existing models.	Page 2/line 42-65	Introduction/Para1-2
	3b	Specify the objectives, including whether the study describes the development or validation of the model or both.	Page 3/line 65-68	Introduction/Para2
Methods				
Source of data	4a	Describe the study design or source of data (e.g., randomized trial, cohort, or registry data), separately for the development and validation data sets, if applicable.	Page 3/line 74-75	Methods/Para1
	4b	Specify the key study dates, including start of accrual; end of accrual; and, if applicable, end of follow-up.	Page 3/line74	Methods/Para1
Participants	5a	Specify key elements of the study setting (e.g., primary care, secondary care, general population) including number and location of centres.	Page 3/line 74	Methods/Para1
	5b	Describe eligibility criteria for participants.	Page 4/line 75-79	Methods/Para1
	5c	Give details of treatments received, if relevant.	N/A(No need of information on treatments)	N/A
Outcome	6a	Clearly define the outcome that is predicted by the prediction model, including how and when assessed.	Page 4/line 90-93	Methods/Para1
	6b	Report any actions to blind assessment of the outcome to be predicted.	Page 5/line 109	Methods/Para2
Predictors	7a	Clearly define all predictors used in developing or validating the multivariable prediction model, including how and when they were measured.	Page 4/line 83-90	Methods/Para1
	7b	Report any actions to blind assessment of predictors for the outcome and other predictors.	Page 4/line90	Methods/Para1
Sample size	8	Explain how the study size was arrived at.	Page 4/line 80-81	Methods/Para1

Missing data	9	Describe how missing data were handled (e.g., complete-case analysis, single imputation, multiple imputation) with details of any imputation method.	Page 4/line 79	Methods/Para1
Statistical analysis methods	10a	Describe how predictors were handled in the analyses.	Page 6/line113-128	Methods/Para3
	10b	Specify type of model, all model-building procedures (including any predictor selection), and method for internal validation.	Page 6/line117-131	Methods/Para3
	10d	Specify all measures used to assess model performance and, if relevant, to compare multiple models.	Page 6/line 128-131	Methods/Para3
Risk groups	11	Provide details on how risk groups were created, if done.	N/A(No need)	N/A
Results				
Participants	13a	Describe the flow of participants through the study, including the number of participants with and without the outcome and, if applicable, a summary of the follow-up time. A diagram may be helpful.	Page 16/line 414	Figure1.
	13b	Describe the characteristics of the participants (basic demographics, clinical features, available predictors), including the number of participants with missing data for predictors and outcome.	Page 6/line 133-137	Results/Para 1
Model development	14a	Specify the number of participants and outcome events in each analysis.	Page 6/line 133-137	Results/Para 1
	14b	If done, report the unadjusted association between each candidate predictor and outcome.	Page 17/line 437	Table2
Model specification	15a	Present the full prediction model to allow predictions for individuals (i.e., all regression coefficients, and model intercept or baseline survival at a given time point).	Page 7/line 150-153	Results/Para 1
	15b	Explain how to use the prediction model.	Page 7/line 153-156	Results/Para 1
Model performance	16	Report performance measures (with CIs) for the prediction model.	Page 7/line 157、162、449	Results/Para3
Discussion				
Limitations	18	Discuss any limitations of the study (such as nonrepresentative sample, few events per predictor, missing data).	Page 13/line 291-306	Discussion/Para12
Interpretation	19b	Give an overall interpretation of the results, considering objectives, limitations, and results from similar studies, and other relevant evidence.	Page 8/line 183-290	Discussion/Para1-11
Implications	20	Discuss the potential clinical use of the model and implications for future research.	Page 13/line 305-306	Discussion/Para12
Other information				
Supplementary information	21	Provide information about the availability of supplementary resources, such as study protocol, Web calculator, and data sets.	N/A (It was explained in methods)	N/A
Funding	22	Give the source of funding and the role of the funders for the present study.	Page 14/line330	Other information/Para1
