

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/tcr-19-2887	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The incidence of probable and proven IFD after allogeneic stem cell transplantation will be shared. Also, risk factors independently associated with IFD and survival rates between different drug groups will be shared as well, which has seldom been provided in previous studies.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Microbiologists and medical physicians who are interested in fungal infection.
8	For what type of analysis or purpose?	For evaluation, the effects of different antifungal prophylaxes on the incidence of IFD at different times after transplantation.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: huangxiaojun@bjmu.edu.cn.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
