In October 2015, *Translational Cancer Research (TCR)* was selected for coverage in Science Citation Index Expanded (SCIE), Thomson Reuters product. *TCR* articles from Volume 1, Number 1 will be indexed well in the database and be searchable online at the Web of Knowledge™ core collection.

Translational Cancer Research (Transl Cancer Res TCR; Print ISSN: 2218-676X; Online ISSN 2219-6803; www.thetcr.org) is an open access, peer review journal published bimonthly both in print and online, published and run by AME Publishing Company. The operation of *TCR* journal is driven by the leadership and passion of Editor-in-Chief, Prof. Eric Chuang (National Taiwan University) and co-Editor-in-Chief, Dr. Huan Giap (Scripps Proton Therapy Center). Dr. Binghe Xu (Cancer Hospital and Institute, Chinese Academy of Medical Sciences) joined the journal as Associate Editor-in-Chief in 2014. They devote their time and bring their decades of experience in scientific research and publications for managing this journal.

The indexation of *TCR* journal 3 years upon its launch in SCIE, a very important database, is a landmark to the journal. Since its launch in June 2012, *TCR* journal has been publishing timely and high-quality original articles and review articles as well as other article types authored by important researchers and clinicians in the field. The indexation makes these important articles part of the over 1 billion searchable, cited references in Web of Science, allowing *TCR* articles to be linked with studies of more researchers and clinicians internationally. Without any doubts, the database would increase the impact of *TCR* journal among other publications; meanwhile, hope the

journal would add more significance to the database as well.
