Cover		Shuanghuanglian preparations and bioactive ingredients including baicalin and baicalein dose-dependently inhibited SARS-CoV-2 3CL protease and the replication of SARS-CoV-2 <i>in vitro</i> . The crystal structure of SARS-CoV-2 3CL protease in complex with baicalein revealed a unique binding mode of this bioflavonoid as the noncovalent and nonpeptidomimetic inhibitor of the protease. See the article in pages 1167-1177.
