

## Data Sharing Statement

<b>Article Info</b>	https://dx.doi.org/10.21037/jxym-21-34	
<b>Item</b>	<b>Question</b>	<b>Authors' Response</b> (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The treatment response data in particular will be shared as most of the previous studies found a significantly higher response with hyperfractionation but this was not seen in our study rather only toxicity increased.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plan, informed consent form will also be shared if requested.
5	When will data availability begin?	From the publication date
6	When will data availability end?	Two years within the publication date since the technique and henceforth clinical outcome may be updated over the time
7	To whom will you share the data?	Radiation oncologists
8	For what type of analysis or purpose?	For analysis to evaluate the effectiveness of hyperfractionated radiotherapy in locally advanced head and neck cancer.
9	How or where can the data/documents be obtained?	One can send emails to the address below to obtain the shared data: <a href="mailto:mohsinkhan793@gmail.com">mohsinkhan793@gmail.com</a> <a href="mailto:zarmina8505@gmail.com">zarmina8505@gmail.com</a>
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
