

## Data Sharing Statement

<b>Article Info</b>	<a href="https://dx.doi.org/10.21037/jxym-22-22">https://dx.doi.org/10.21037/jxym-22-22</a>	
<b>Item</b>	<b>Question</b>	<b>Authors' Response (place "-" if not applicable)</b>
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The data regarding the statistically significant correlation of Interleukin 6 and Serum lactate to predict morbidity which will be useful in clinical practice in developing countries like India
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival data may be updated over time.
7	To whom will you share the data?	The data will be shared with General surgeons, Emergency medicine physicians, Orthopedic surgeons, Critical care specialists and others involved in treating cases of Polytrauma
8	For what type of analysis or purpose?	To predict morbidity and mortality of patients with polytrauma and multiple trauma and tailor their treatment according to the levels of biomarkers
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data:  Email: sammyjenny2014@gmail.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
