

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/dmr-20-75	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The demographic, baseline laboratory values and frequency of BMI in figures and tables will be shared, in addition we found correlation between fatty liver disease in patients with CHB using CAP measurements than previously mentioned.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Five years within the publication date.
7	To whom will you share the data?	Gastroenterologists and Epidemiologists who are interested in disparities research and use of CAP measurements in the outpatient setting.
8	For what type of analysis or purpose?	For analysis to evaluate the differences in fibrosis among fatty liver disease and HBV seen in various ethnic groups.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: Ssaab@mednet.ucla.edu
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
