A signing ceremony was held between the West China Second Hospital (WCSH) of Sichuan University (also named as West China Women's and Children's Hospital) and AME Publishing Company in Chengdu on April 25, 2018, marking the launch of a new journal *Gynecology and Pelvic Medicine (GPM)* (Figure 1). The ceremony was attended by Prof. Hanmin Liu, director of WCSH; Prof. Xiaoyu Niu, deputy director of WCSH; Prof. Xia Zhao, director of the Department of Obstetrics and Gynecology of WCSH; Prof. Ping Wang, chief of the Gynecology Department; Mr. Daoyuan Wang, president of AME Publishing Company; Ms. Yan Fang, vice president of AME Publishing Company; and Mr. Qi Li, director of AME Chengdu Office.

Based on AME's rich experience in publishing international peer-reviewed journals, the strong partnership between WCSH and AME will ensure *GPM* a great success. Focusing on basic, translational, and clinical research in obstetrics and gynecology, *GPM* is committed to serving as an international academic exchange platform, promoting the academic exchanges among Chinese and foreign scientists and clinicians, and further increasing WCSH's international impact.

Prof. Hanmin Liu (Figure 2) emphasized the significance of *GPM* for WCSH in his speech at the ceremony. "Creating a high-profile SCI-indexed journal has long been the vision of WCSH. We hope that, through this cooperation, we will truly own a SCI-listed journal." said Prof. Liu, "We will work with colleagues from AME to run *GPM*, building a good reputation for this journal and truly achieving 'quality first'."

President Daoyuan Wang (Figure 3) appreciated the supports from WCSH. "Prof. Liu's high expectation on

*GPM* is both pressure and motivation for us." said Wang. "*GPM* is also of great significance to AME. It is the first peer-reviewed journal launched by AME Chengdu Office and we will do our best to make it a success." AME has published more than 50 peer-reviewed journals (6 indexed in SCIE and 18 indexed in PubMed), covering various fields of medicine. "Our consistent philosophy is to create journals well recognized and respected by our global peers. We will prove it." Wang added.

Prof. Xia Zhao, editor-in-chief of *GMP*, and Prof. Xiaoyu Niu, executive editor of *GMP*, stated that they will do their utmost to make the journal a great success, with high impacts in Southwestern China, nationwide, and globally, which will also help to bring WCSH to a higher platform (Figures 4,5). Prof. Ping Wang said that every effort will be made to facilitate the steady growth of *GMP* (Figure 6).

WCSH and AME will hold a news release conference on June 9 to formally announce the establishment of *GPM* (Figure 7).

## About AME

Founded in July 2009, AME Publishing Company (abbreviated as AME, representing Academic Made Easy, Excellent and Enthusiastic) is a medical publishing company advocating innovation, with global perspective and Internet thinking. AME has established professional journal operation teams that provide full-process publishing services, with soliciting contributions from global authors as its core competitiveness. Focusing on the publication of international medical journals/books and the promotion of medical research information, AME has opened its offices
