Reviewer A

Comment 1: I suggest another round of language revision, in order to correct few typos and improve readability.

Changes in the text: I have already done another round of language revision to correct the typos and improve readability.

Comment 2: The introduction should be extended and completed. I find interesting to include a reference to technique currently in use for the treatment of cervical cancer (see PMID: 36141917).

Changes in the text: I have already read the article PMID: 36141917 and extended and completed introduction

Comment 3: I suggest to amplify references citing novel and relevant articles (I suggest authors to read and insert in references the following article PMID: 36498515).

Changes in the text: I have already read and inserted the article PMID: 36498515 and amplified references citing novel and relevant articles.

Comment 4: The authors have not adequately highlighted the strengths and limitations of their study. I suggest better specifying these points

Changes in the text: We highlighted the strengths and limitations of their study in discussion.

Comment 5: Legends of figures should be added.

Changes in the text: Legends of figures was added.

Reviewer B

Comment 1: In particular, I suggest these articles to get deeper in the topic: PMID: 35909005 and PMID: 37149905. Because of these reasons, the article should be revised and completed.

Changes in the text: We have read the two articles (PMID: 35909005 and PMID: 37149905) and revised the discussion part.
