Reviewer A

Please revise grammar

Introduction and case presentations are well written

However, discussion has repetitive mentions of mesonephric like adenocarcinoma article, please cut it short

Reply1: I have revised the grammar for the whole manuscript. And Cut the repetitive mentions of mesonephric like adenocarcinoma article (see Page 11, line 207-209).

Reviewer B

The article is well written and very interesting, as regards a rare and still not well understood entity among tumors of gynecological tract. I would advise to insert in the discussion a little paragraph regarding the “mesonephric-like carcinosarcoma” of the cervix, endometrium and the ovary, with the relative references (e.g. doi: 10.3390/diagnostics11050827), because the “sarcomatous” transformation is a possibility in this tumors and may lead to a more aggressive course of the disease.

Reply2: I have added some information of mesonephric-like carcinosarcoma” of the ovary as advised in the manuscript (see Page 11, line 209-211).
