Section/item	ltem No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Page2/line 29	Abstract/Para 2
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Page2/line 33	Abstract/Para 3
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Page3-4/line 45-6`	Introduction/Para1-4
Objectives	3	State specific objectives, including any prespecified hypotheses	Page 3-4/line 63-68	Introduction/Para 3-4
Methods				•
Study design	4	Present key elements of study design early in the paper	Page 3-4/line 73-77	Methods/Paral
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page 3-4/line 73-77	Methods/Paral
Participants	6	<ul> <li>(a) Cohort study—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up</li> <li>Case-control study—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls</li> <li>Cross-sectional study—Give the eligibility criteria, and the sources and methods of selection of participants</li> </ul>	Page 3-4/line 73-77	Methods/Para l
		(b) <b>Cohort study</b> —For matched studies, give matching criteria and number of exposed and unexposed <b>Case-control study</b> —For matched studies, give matching criteria and the number of controls per case	Page 3-4/line 73-77	Methods/Para1
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Page 3-4/line 79-93	Methods/Para 2-3
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Page 3-4/line 79-93	Methods/Para 2-3
Bias	9	Describe any efforts to address potential sources of bias	Page 3-4/line 79-93	Methods/Para 2-3
Study size	10	Explain how the study size was arrived at	Page 3-4/line 79-93	Methods/Para 2-3
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Page 3-4/line 79-93	Methods/Para 2-3

## STROBE Statement-checklist of items that should be included in reports of observational studies

12	(a) Describe all statistical methods, including those used to control for confounding	Page 4-5/line 104-117	Methods/Para 5-9
	(b) Describe any methods used to examine subgroups and interactions	Page 4-5/line 104-117	Methods/Para 5-9
	(c) Explain how missing data were addressed	Page 4-5/line 104-117	Methods/Para 5-9
	(d) Cohort study—If applicable, explain how loss to follow-up was addressed Case-control study—If applicable, explain how matching of cases and controls was addressed Cross-sectional study—If applicable, describe analytical methods taking account of sampling strategy	Page 4-5/line 104-117	Methods/Para 5-9
	(e) Describe any sensitivity analyses	Page 4-5/line 104-117	Methods/Para 5-9
•		·	·
13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Page 5-6/line 152-157	Results/Para 1
	(b) Give reasons for non-participation at each stage	Page 5-6/line 152-157	Results/Para1
	(c) Consider use of a flow diagram	Page 5-6/line 152-157	Results/Para1
14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	Page 5-6/line 152-169	Results/Para1-3
	(b) Indicate number of participants with missing data for each variable of interest	Page 5-6/line 152-169	Results/Para1-3
	(c) Cohort study-Summarise follow-up time (eg, average and total amount)	Page 5-6/line 152-169	Results/Para1-3
15*	Cohort study-Report numbers of outcome events or summary measures over time	Page 5-6/line 152-169	Results/Para1-3
	Case-control study-Report numbers in each exposure category, or summary measures of exposure	n/a	n/a
	Cross-sectional study-Report numbers of outcome events or summary measures	n/a	n/a
16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Page 5-6/line 152-169	Results/Para1-3
	(b) Report category boundaries when continuous variables were categorized	Page 5-6/line 152-169	Results/Para1-3
	(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	Page 5-6/line 152-169	Results/Para1-3
17	Report other analyses done-eg analyses of subgroups and interactions, and sensitivity analyses	Page 5-6/line 152-169	Results/Para1-3
18	Summarise key results with reference to study objectives	Page 6-7/line 17-220	Discussion/Paral-4
19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	Page 6-7/line 17-220	Discussion/Para1-4
	13* 14* 15* 16 17 18	(b) Describe any methods used to examine subgroups and interactions         (c) Explain how missing data were addressed         (d) Cohort study—If applicable, explain how loss to follow-up was addressed         Case-control study—If applicable, explain how matching of cases and controls was addressed         Cross-sectional study—If applicable, explain how matching of cases and controls was addressed         Cross-sectional study—If applicable, explain how matching of cases and controls was addressed         (a) Beport numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed         (b) Give reasons for non-participation at each stage         (c) Consider use of a flow diagram         14*         (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders         (b) Indicate number of participants with missing data for each variable of interest         (c) Cohort study—Summarise follow-up time (eg, average and total amount)         15*       Cohort study—Report numbers of outcome events or summary measures of exposure         Cross-sectional study—Report numbers of outcome events or summary measures         16       (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included         (b) Report category boundarie	(b) Describe any methods used to examine subgroups and interactions         Page 4-5/time 104-117           (c) Explain how missing data were addressed         Page 4-5/time 104-117           (d) Cohort study—If applicable, explain how loss to follow-up was addressed Cross-sectional study—If applicable, explain how matching of cases and controls was addressed         Page 4-5/time 104-117           (d) Cohort study—If applicable, explain how loss to follow-up was addressed Cross-sectional study—If applicable, describe analytical methods taking account of sampling strategy         Page 4-5/time 104-117           (a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed         Page 5-6/time 152-157           (c) Consider use of a flow diagram         Page 5-6/time 152-157         (c) Consider use of a flow diagram         Page 5-6/time 152-169           (b) Indicate number of participants (eg demographic, clinical, social) and information on exposures and potential confounders         Page 5-6/time 152-169           (c) Cohort study—Report numbers of outcome events or summary measures over time         Page 5-6/time 152-169           15*         Cohort study—Report numbers of outcome events or summary measures         n/a           16         (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjus

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Page7/line 212-226	Discussion/Para3-8			
Generalisability	21	Discuss the generalisability (external validity) of the study results	Page7/line 212-226	Discussion/Para 3-8			
Other information							
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	Page 8/line 242-244	Funding Support			

\*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
