

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/gs-22-585	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	All of our data will be shared. We found age, number of positive SLN, number of negative SLN, resected tumor size, and monocyte count were associated with non-SLNs metastases.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival data may be updated over time.
7	To whom will you share the data?	Medical oncologists and breast surgeons who are interested in studies of non-SLN.
8	For what type of analysis or purpose?	For analysis to set up a novel model predicting non-sentinel lymph nodes (SLN) metastases in these patients with positive SLNs, using

		preoperative and intraoperative characteristics and inflammatory indicators
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: kanghua@xwh.ccmu.edu.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
