

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/gc-24-118	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	All study-related raw data. Including methods and procedures for uterine artery embolization through the distal radial artery.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plan, informed consent form, clinical study report, as well as surgical procedures and precautions.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique may be updated over time.
7	To whom will you share the data?	Interventional physicians and gynecologists interested in uterine artery embolization studies via the distal radial artery route or other interventional procedures via this route.
8	For what type of analysis or purpose?	For analysis to evaluate the safety of uterine artery embolization studies via the distal radial artery route.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: wangxinsen@jlu.edu.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
