

CONSORT 2010 checklist of information to include when reporting a randomised trial*

Section/Topic	Item No	Checklist item	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract				
	1a	Identification as a randomised trial in the title	Page1/Line3-5	Title/Paragraph1
	1b	Structured summary of trial design, methods, results, and conclusions (for specific guidance see Table 2)	Page2-3/Line37-73	Abstract/Paragraph1-4
Introduction				
Background and objectives	2a	Scientific background and explanation of rationale	Page3/Line79-104	Introduction/Paragraph1-3
	2b	Specific objectives or hypotheses	Page3-4/Line106-113	Introduction/Paragraph4
Methods				
Trial design	3a	Description of trial design (such as parallel, factorial) including allocation ratio	Page4/Line116-123	Methods/Paragrash1
	3b	Important changes to methods after trial commencement (such as eligibility criteria), with reasons	N/A	N/A
Participants	4a	Eligibility criteria for participants	Page5/Line125-144	Methods/Paragrash2-3
	4b	Settings and locations where the data were collected	Page4/Line117-122	Methods/Paragrash1
Interventions	5	The interventions for each group with sufficient details to allow replication, including how and when they were actually administered	Page4/Line159-186	Methods/Paragrash1-2
Outcomes	6a	Completely defined pre-specified primary and secondary outcome measures, including how and when they were assessed	Page6-7/Line201-230	Methods/Paragrash9-10
	6b	Any changes to trial outcomes after the trial commenced, with reasons	N/A	N/A
Sample size	7a	How sample size was determined	Page4-5/Line135-142	Methods/Paragrash2
	7b	When applicable, explanation of any interim analyses and stopping guidelines	N/A	N/A
Randomisation:				
Sequence generation	8a	Method used to generate the random allocation sequence	Page5/Line147-148	Methods/Paragrash4
	8b	Type of randomisation; details of any restriction (such as blocking and block size)	Page5/Line150-155	Methods/Paragrash4
Allocation concealment	9	Mechanism used to implement the random allocation sequence (such as sequentially numbered containers), describing any steps taken to conceal the sequence until interventions were assigned	Page5/Line148-150	Methods/Paragrash4

Implementation	10	Who generated the random allocation sequence, who enrolled participants, and who assigned participants to interventions	Page5/Line147-151	Methods/Paragraph4
Blinding	11a	If done, who was blinded after assignment to interventions (for example, participants, care providers, those assessing outcomes) and how	Page5/Line148-155	Methods/Paragraph4
	11b	If relevant, description of the similarity of interventions	N/A	N/A
Statistical methods	12a	Statistical methods used to compare groups for primary and secondary outcomes	Page8/Line254-265	Methods/Paragraph15
	12b	Methods for additional analyses, such as subgroup analyses and adjusted analyses	N/A	N/A
Results				
Participant flow (a diagram is strongly recommended)	13a	For each group, the numbers of participants who were randomly assigned, received intended treatment, and were analysed for the primary outcome	Page8-9/Line269-272	Results/Paragraph1 Figure1
	13b	For each group, losses and exclusions after randomisation, together with reasons	Figure1	Figure1
Recruitment	14a	Dates defining the periods of recruitment and follow-up	Page8-9/Line269-272 Page7/Line228-230	Results/Paragraph1 Methods/Paragraph10
	14b	Why the trial ended or was stopped	N/A	N/A
Baseline data	15	A table showing baseline demographic and clinical characteristics for each group	Page21/Line666-670	Results/ Table1
Numbers analysed	16	For each group, number of participants (denominator) included in each analysis and whether the analysis was by original assigned groups	Figure1	Figure1
Outcomes and estimation	17a	For each primary and secondary outcome, results for each group, and the estimated effect size and its precision (such as 95% confidence interval)	Page9-10/Line274-312	Results/Paragraph2-9
	17b	For binary outcomes, presentation of both absolute and relative effect sizes is recommended	N/A	N/A
Ancillary analyses	18	Results of any other analyses performed, including subgroup analyses and adjusted analyses, distinguishing pre-specified from exploratory	N/A	N/A
Harms	19	All important harms or unintended effects in each group (for specific guidance see CONSORT for harms)	N/A	N/A
Discussion				
Limitations	20	Trial limitations, addressing sources of potential bias, imprecision, and, if relevant, multiplicity of analyses	Page11/Line356-360	Discussion/Paragraph3
Generalisability	21	Generalisability (external validity, applicability) of the trial findings	Page11-12/Line361-386	Discussion/Paragraph4
Interpretation	22	Interpretation consistent with results, balancing benefits and harms, and considering other relevant evidence	Page10-13/Line322-406	Discussion/Paragraph2-6
Other information				
Registration	23	Registration number and name of trial registry	Page3/Line74	Abstract/Paragraph5

Protocol	24	Where the full trial protocol can be accessed, if available	N/A	Acknowledgments
Funding	25	Sources of funding and other support (such as supply of drugs), role of funders	Page13/Line415-423	Acknowledgments/Paragraph1

*We strongly recommend reading this statement in conjunction with the CONSORT 2010 Explanation and Elaboration for important clarifications on all the items. If relevant, we also recommend reading CONSORT extensions for cluster randomised trials, non-inferiority and equivalence trials, non-pharmacological treatments, herbal interventions, and pragmatic trials. Additional extensions are forthcoming: for those and for up to date references relevant to this checklist, see www.consort-statement.org.

Table 2 Items to include when reporting a randomized trial in a journal or conference abstract

Item	Description	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title	Identification of the study as randomized	Page1/Line3-5	Title
Authors *	Contact details for the corresponding author	Page1/Line29-32	Correspondence
Trial design	Description of the trial design (e.g. parallel, cluster, non-inferiority)	Page2/Line43-58	Abstract/Paragraph2
Methods			
Participants	Eligibility criteria for participants and the settings where the data were collected	Page4/Line117-123	Methods/Paragraph1
Interventions	Interventions intended for each group	Page5-6/Line158-186	Methods/Paragraph5-6
Objective	Specific objective or hypothesis	Page2/Line37-42	Abstract/Paragraph1
Outcome	Clearly defined primary outcome for this report	Page2/Line59-65	Abstract/Paragraph3
Randomization	How participants were allocated to interventions	Page5/Line147-151	Methods/Paragraph4
Blinding (masking)	Whether or not participants, care givers, and those assessing the outcomes were blinded to group assignment	Page5/Line148-155	Methods/Paragraph5
Results			
Numbers randomized	Number of participants randomized to each group	Figure1	Figure1
Recruitment	Trial status	N/A	N/A
Numbers analysed	Number of participants analysed in each group	Figure1	Figure1
Outcome	For the primary outcome, a result for each group and the estimated effect size and its precision	Page9/Line274-278	Results/Paragraph2
Harms	Important adverse events or side effects	N/A	N/A

Conclusions	General interpretation of the results	Page3/line70-73	Abstract/Paragraph4
Trial registration	Registration number and name of trial register	Page3/Line74	Abstract/Paragraph5
Funding	Source of funding	Page13/Line415-423	Acknowledgments/Paragraph1

** this item is specific to conference abstracts*
