

## PRISMA 2009 Checklist

Section/topic	Item No	Checklist item	Reported on Page Number/Line Number	Reported on Section/Paragraph
<b>TITLE</b>				
Title	1	Identify the report as a systematic review, meta-analysis, or both.	Page2-3/Line1-2	Title
<b>ABSTRACT</b>				
Structured summary	2	Provide a structured summary including, as applicable: background; objectives; data sources; study eligibility criteria, participants, and interventions; study appraisal and synthesis methods; results; limitations; conclusions and implications of key findings; systematic review registration number.	Page2/Line23-40	Abstract/Paragrah1-4
<b>INTRODUCTION</b>				
Rationale	3	Describe the rationale for the review in the context of what is already known.	Page2-3/Line43-68	Introduction/Para1-3
Objectives	4	Provide an explicit statement of questions being addressed with reference to participants, interventions, comparisons, outcomes, and study design (PICOS).	Page3/Line69-83	Introduction/Para 4
<b>METHODS</b>				
Protocol and registration	5	Indicate if a review protocol exists, if and where it can be accessed (e.g., Web address), and, if available, provide registration information including registration number.	Page3/Line86-87	Method/ Para 1
Eligibility criteria	6	Specify study characteristics (e.g., PICOS, length of follow-up) and report characteristics (e.g., years considered, language, publication status) used as criteria for eligibility, giving rationale.	Page4/Line97-103	Method/ Para 3
Information sources	7	Describe all information sources (e.g., databases with dates of coverage, contact with study authors to identify additional studies) in the search and date last searched.	Page4/Line89-95	Method/ Para 2
Search	8	Present full electronic search strategy for at least one database, including any limits used, such that it could be repeated.	Page4/Line92-95	Method/ Para 2

Study selection	9	State the process for selecting studies (i.e., screening, eligibility, included in systematic review, and, if applicable, included in the meta-analysis).	Page4-5/Line105--111	Method/ Para 4
Data collection process	10	Describe method of data extraction from reports (e.g., piloted forms, independently, in duplicate) and any processes for obtaining and confirming data from investigators.	Page4-5/Line105--111	Method/ Para 4
Data items	11	List and define all variables for which data were sought (e.g., PICOS, funding sources) and any assumptions and simplifications made.	Page4-5/Line107--111	Method/ Para 4

Risk of bias in individual studies	12	Describe methods used for assessing risk of bias of individual studies (including specification of whether this was done at the study or outcome level), and how this information is to be used in any data synthesis.	Page5/Line113-118	Method/ Para 5
Summary measures	13	State the principal summary measures (e.g., risk ratio, difference in means).	Page5/Line118-124	Method/ Para 5
Synthesis of results	14	Describe the methods of handling data and combining results of studies, if done, including measures of consistency (e.g., I <sup>2</sup> ) for each meta-analysis.	Page5/Line118-124	Method/ Para 5
Risk of bias across studies	15	Specify any assessment of risk of bias that may affect the cumulative evidence (e.g., publication bias, selective reporting within studies).	Page5/Line113-118	Method/ Para 5
Additional analyses	16	Describe methods of additional analyses (e.g., sensitivity or subgroup analyses, meta-regression), if done, indicating which were pre-specified.	Page5/Line113-118	Method/ Para 5

## RESULTS

Study selection	17	Give numbers of studies screened, assessed for eligibility, and included in the review, with reasons for exclusions at each stage, ideally with a flow diagram.	Page6/Line127-132	Result/ Para 1
Study characteristics	18	For each study, present characteristics for which data were extracted (e.g., study size, PICOS, follow-up period) and provide the citations.	Page6/Line134-141	Result/ Para 2
Risk of bias within studies	19	Present data on risk of bias of each study and, if available, any outcome level assessment (see item 12).	Page6/Line143-151	Result/ Para 3
Results of individual studies	20	For all outcomes considered (benefits or harms), present, for each study: (a) simple summary data for each intervention group (b) effect estimates and confidence intervals, ideally with a forest plot.	Page7-8/Line153-191	Result/ Para 4-10

Synthesis of results	21	Present results of each meta-analysis done, including confidence intervals and measures of consistency.	Page7-8/Line153-191	Result/ Para 4-10
Risk of bias across studies	22	Present results of any assessment of risk of bias across studies (see Item 15).	Page6/Line143-151	Result/ Para 3
Additional analysis	23	Give results of additional analyses, if done (e.g., sensitivity or subgroup analyses, meta-regression [see Item 16]).	Page8-9/Line192-200	Result/ Para 11-12
<b>DISCUSSION</b>				
Summary of evidence	24	Summarize the main findings including the strength of evidence for each main outcome; consider their relevance to key groups (e.g., healthcare providers, users, and policy makers).	Page9-12/Line205-262	Discussion/ Para 1-5
Limitations	25	Discuss limitations at study and outcome level (e.g., risk of bias), and at review-level (e.g., incomplete retrieval of identified research, reporting bias).	Page12/Line262-266	Discussion/ Para 6
Conclusions	26	Provide a general interpretation of the results in the context of other evidence, and implications for future research.	Page12/Line268-271	Discussion/ Para 7
<b>FUNDING</b>				
Funding	27	Describe sources of funding for the systematic review and other support (e.g., supply of data); role of funders for the systematic review.	Page12/Line277-278	Funding
