

## Data Sharing Statement

|                     |   |   |
|---------------------|---|---|
| <b>Article Info</b> | https://dx.doi.org/10.21037/gs-21-734   |   |
| <b>Item</b>         | <b>Question</b>   | <b>Authors' Response<br/>(place "-" if not applicable)</b>  |
| 1                   | Would you like to share data collected for your study to others?  | Yes   |
| 2                   | If not, would you like to share the reason for your decision?   | -   |
| 3                   | What data in particular will be shared?   | Blinded patient data, surgical data, outcome  |
| 4                   | Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code. | Study protocol is available in the manuscript. The study is a case series: no statistical analysis could be performed; only percentages could be calculated |
| 5                   | When will data availability begin?  | From the publication date   |
| 6                   | When will data availability end?  | Two years within the publication date, since the technique may be updated over time   |
| 7                   | To whom will you share the data?  | Medical oncologists, breast and plastic surgeons who are interested in the technique  |
| 8                   | For what type of analysis or purpose?   | For analysis of the safety of the outcomes of the technique in larger series  |
| 9                   | How or where can the data/documents be obtained?  | Email could be sent to the address below to obtain the shared data:<br>t.tondu@clinic12b.be   |
| 10                  | Any other restrictions?   | We may balance the potential benefits and risks for each request and then provide the data that could be shared.  |
