

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/hbsn-22-382	
Item	Question	Authors' Response (place “-” if not applicable)
1	Would you like to share data collected for your study to others?	Yes, the data that support the findings of this study are available from the corresponding author, upon reasonable request.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The R codes and the processing data could be obtained by contacting the authors.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Yes, the data that support the findings of this study are available from the corresponding author, upon reasonable request.
5	When will data availability begin?	-
6	When will data availability end?	-
7	To whom will you share the data?	All the researchers who are interested in the application of the predictive nomogram in the improvement of surgical outcomes and the detection of postoperative diabetes for the patients after pancreatic body and tail surgery.
8	For what type of analysis or purpose?	The application of the predictive nomogram in the improvement of surgical outcomes and the detection of postoperative diabetes for the patients after pancreatic body and tail surgery.
9	How or where can the data/documents be obtained?	The data analyzed in this study could be accessible in the electronic medical record system of Peking Union Medical College Hospital and Guangdong Provincial People's Hospital. The R codes and the processing data could be obtained by contacting the authors.
10	Any other restrictions?	-
