

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/atm-22-2022	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Patient's radiograph and radiographic measurements in particular will be shared. We found a correlation between hinge position and opening angle during the TCVO procedure, which has never been provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol and MATLAB Code will also be shared if requested.
5	When will data availability begin?	This study belongs to part of a proceeding cohort study plan. The follow-up is still on the way. The data requires to be confidential before the end of the study plan. Data availability will begin after the study plan completes.
6	When will data availability end?	One year within the date when data availability begins, since the surgical technique may be updated over time.
7	To whom will you share the data?	The orthopedic surgeons and researchers who are interested in studies of TCVO and request the data with a reasonable request.
8	For what type of analysis or purpose?	For pre-operative surgical planning or design of the fixation plate for TCVO.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: orthokang@163.com
10	Any other restrictions?	We may balance the potential benefits and risks and then provide the data that could be shared.
