

Materials Design Analysis Reporting (MDAR) Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: [doi:10.31222/osf.io/9sm4x](https://doi.org/10.31222/osf.io/9sm4x)). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided: section/paragraph)	n/a
For commercial reagents, provide supplier name, catalogue number and RRID, if available.	Yes (Materials and Methods/paragraph 8)	
Cell materials	Yes (indicate where provided: section/paragraph)	n/a
Cell lines: Provide species information, strain. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID	Yes (Materials and Methods/paragraph 9)	
Primary cultures: Provide species, strain, sex of origin, genetic modification status.	Yes (Materials and Methods/paragraph 9)	
Experimental animals	Yes (indicate where provided: section/paragraph)	n/a
Laboratory animals: Provide species, strain, sex, age, genetic modification status. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID	No animal experiments were involved in this study	n/a
Animal observed in or captured from the field: Provide species, sex and age where possible	No animal experiments were involved in this study	n/a
Model organisms: Provide Accession number in repository (where relevant) OR RRID	No animal experiments were involved in this study	n/a
Plants and microbes	Yes (indicate where provided: section/paragraph)	n/a
Plants: provide species and strain, unique accession number if available, and source (including location for collected wild specimens)	No Plants were involved in this study	n/a
Microbes: provide species and strain, unique accession number if available, and source	No microbes were involved in this study	n/a
Human research participants	Yes (indicate where provided: section/paragraph)	n/a
Identify authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Yes (Materials and Methods/paragraph 6)	
Provide statement confirming informed consent obtained from study participants.	Yes (Materials and Methods/paragraph 6)	
Report on age and sex for all study participants.	In this study, the classification is only according to tumor grade, not according to age and gender. However, we have retained the list of patients with the original data, and we can provide the data of the original list if necessary	n/a

Design

Study protocol	Yes (indicate where provided: section/paragraph)	n/a
For clinical trials, provide the trial registration number OR cite DOI in manuscript.	It is not clinical trials.	n/a
Laboratory protocol	Yes (indicate where provided: section/paragraph)	n/a
Provide DOI or other citation details if detailed step-by-step protocols are available.	Yes (Materials and Methods/paragraph 7-14)	
Experimental study design (statistics details)	Yes (indicate where provided: section/paragraph)	n/a
State whether and how the following have been done, or if they were not carried out.		
Sample size determination	No related content is involved	n/a
Randomisation	No related content is involved	n/a
Blinding	No related content is involved	n/a
Inclusion/exclusion criteria	No related content is involved	n/a
Sample definition and in-laboratory replication	Yes (indicate where provided: section/paragraph)	n/a
State number of times the experiment was replicated in laboratory	Yes (Materials and Methods/paragraph 15)	
Define whether data describe technical or biological replicates	Yes (Materials and Methods/paragraph 15)	
Ethics	Yes (indicate where provided: section/paragraph)	n/a
Studies involving human participants: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	No human participation were involved in this study	n/a
Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	No animal experiments were involved in this study	n/a
Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.	Yes (Materials and Methods/paragraph 5)	
Dual Use Research of Concern (DURC)	Yes (indicate where provided: section/paragraph)	n/a
If study is subject to dual use research of concern, state the authority granting approval and reference number for the regulatory approval	No related content is involved	n/a

Analysis

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is excluded, and whether the criteria for exclusion were determined and specified in advance.	Yes (Materials and Methods/paragraph 15)	
Statistics	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of tests.	Yes (Materials and Methods/paragraph 5)	
Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available, including protocols for access or restriction on access.	Yes (Materials and Methods/paragraph 5)	
If data are publicly available, provide accession number in repository or DOI or URL.	Yes (Materials and Methods/paragraph 1-4)	
If publicly available data are reused, provide accession number in repository or DOI or URL, where possible.	Yes (Materials and Methods/paragraph 1-4)	
Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential for replicating the main findings of the study:		
State whether the code or software is available.	Yes (Materials and Methods/paragraph 1-4)	
If code is publicly available, provide accession number in repository, or DOI or URL.	Yes (Materials and Methods/paragraph 1-4)	

Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.	ICMJE guidelines were followed as the journal follows ICMJE guidelines for publication.
