

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/atm-23-452	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes. We are now doing <i>in vitro</i> and <i>in vivo</i> experiments to validate the finding in this study. Therefore, all collected data could be shared after the research will be finally completed.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Data of Exosome analysis.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the further data may be updated over time.
7	To whom will you share the data?	Esophageal surgeons who are interested in studies of exosome analysis.
8	For what type of analysis or purpose?	For further exosome analysis with large sample size of esophageal cancer.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: yangyang@shsmu.edu.cn.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
