Reviewer A

COMMENT #1: Excellent review, except in our centre, we do direct to-implant, avoid IBBR in current smokers, and restrict IBBR with implants to less than 500ml. Very easy to read and thoroughly written congratulations. It would be nice to review 5 years follow up data on late outcomes as I find these patients have multiple secondary procedures and radiotherapy affects final outcomes.

RESPONSE #1: Thank you for your comment. We are planning on keep evaluating this patient for future studies with a more extensive follow-up.

Reviewer B

COMMENT #1: I want to congratulate the authors for this excellent revision in breast reconstruction.

RESPONSE #1: Thank you for your comment.
