

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/atm-20-6754	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	We would like to share the raw data of qPCR during our development and verification as these data might help other researchers use and improve our method.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	The study protocol, statistical analysis and informed consent form will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Within two years from the publication date, as the detection method may be advanced over time.
7	To whom will you share the data?	Researchers whose research required mutation detection and would like to adopt our method.
8	For what type of analysis or purpose?	For applying MAB PCR in research or further improving this method.
9	How or where can the data/documents be obtained?	Emails could be sent to the corresponding author to obtain the shared data.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
