

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/atm-20-4548	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The gene expression profile data in particular will be shared, and we found some different mechanism between human and monkey with PHA/LPS stimulation, which has seldom been provided in previous studies. For the Reader, the raw microarray data have been deposited in the GEO database under accession number GSE90723.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plan, informed consent form will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Five years with the publication date, since the technique may be updated over time.
7	To whom will you share the data?	Toxicologist and R&D personnel in the pharmaceutical industry who are interested in immunotoxicology.
8	For what type of analysis or purpose?	For preclinical safety evaluation of drugs and risk assessment in animal studies
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: linzhi@nifdc.org.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
