<u>Materials Design Analysis Reporting (MDAR)</u> Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided: section/paragraph)	n/a
For commercial reagents, provide supplier		unused
name, catalogue number and RRID, if available.		
Cell materials	Yes (indicate where provided: section/paragraph)	n/a
Cell lines: Provide species information, strain.		unused
Provide accession number in repository OR		
supplier name, catalog number, clone number,		
OR RRID		
Primary cultures: Provide species, strain, sex of		unused
origin, genetic modification status.		
Experimental animals	Yes (indicate where provided: section/paragraph)	n/a
Laboratory animals: Provide species, strain, sex, age,		unused
genetic modification status. Provide accession		
number in repository OR supplier name, catalog		
number, clone number, OR RRID		
Animal observed in or captured from the		unused
field: Provide species, sex and age where		
possible		
Model organisms: Provide Accession number		unused
in repository (where relevant) OR RRID		
Plants and microbes	Yes (indicate where provided: section/paragraph)	n/a
Plants: provide species and strain, unique accession		unused
number if available, and source (including location		
for collected wild specimens)		
Microbes: provide species and strain, unique		unused
accession number if available, and source		
Human research participants	Yes (indicate where provided: section/paragraph)	n/a
Identify authority granting ethics approval (IRB or	Page 7, line 144-147. Page 18, line 378-383.	
equivalent committee(s), provide reference number		
for approval.		
Provide statement confirming informed consent	Page 7, line 144-147. Page 18, line 378-383.	
obtained from study participants.		
Report on age and sex for all study participants.	Table 1	

Design

	I	1
Study protocol	Yes (indicate where provided: section/paragraph)	n/a
For clinical trials, provide the trial registration		Non
number OR cite DOI in manuscript.		clinica
Laboratory protocol	Yes (indicate where provided: section/paragraph)	n/a
Provide DOI or other citation details if detailed step-	doi: 10.1200/JCO.2011.39.8545, page 7-9, BRCA1/2	
by-step protocols are available.	SNV/indel detection by NGS	
Experimental study design (statistics details)	Yes (indicate where provided: section/paragraph)	n/a
State whether and how the following have been		
done, or if they were not carried out.		
Sample size determination	Page 6, line 122-124.	
Randomisation	Page 6, line 122-124.	
Blinding	Page 6, line 122-124.	
Inclusion/exclusion criteria	Page 6, line 124-129.	
Sample definition and in-laboratory replication	Yes (indicate where provided: section/paragraph)	n/a
State number of times the experiment was	Page 6, line 122.	
replicated in laboratory		
Define whether data describe technical or biological	Page 6, line 122.	
replicates		
Ethics	Yes (indicate where provided: section/paragraph)	n/a
Studies involving human participants: State details of		N/A
authority granting ethics approval (IRB or equivalent		
committee(s), provide reference number for		
approval.		
Studies involving experimental animals: State details		N/A
of authority granting ethics approval (IRB or		
equivalent committee(s), provide reference number		
for approval.		
Studies involving specimen and field samples: State if	Page 7, line 144-147.	
relevant permits obtained, provide details of		
authority approving study; if none were required,		
explain why.		
	Vac (indicate subana manidado acation (noncembro)	n/a
Dual Use Research of Concern (DURC)	Yes (indicate where provided: section/paragraph)	,
If study is subject to dual use research of concern,	res (indicate where provided: section/paragraph)	N/A
	res (indicate where provided: section/paragraph)	-

Analysis

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is	Page 6, line 124-129. Page 8, line 175-176.	
excluded, and whether the criteria for exclusion were		
determined and specified in advance.		

Statistics	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of	Page 10, line 208-214.	
tests.		i

Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available,	Table 1-3, Figure 1-4, supplementary material 1-2	
including protocols for access or restriction on		
access.		
If data are publicly available, provide accession		N
number in repository or DOI or URL.		/A
If publicly available data are reused, provide		N
accession number in repository or DOI or URL, where		/A
possible.		

Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential		
for replicating the main findings of the study:		
State whether the code or software is available.		N
If code is publicly available, provide accession		N
number in repository, or DOI or URL.		/A

Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.	ICMJE guidelines were followed, as the journal follows ICMJE recommendations for publication
