

TRIPOD Checklist: Prediction Model Development

Section	Item	Checklist description	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract				
Title	1	Identify the study as developing and/or validating a multivariable prediction model, the target population, and the outcome to be predicted.	Page1/line2-3	Title/Para1
Abstract	2	Provide a summary of objectives, study design, setting, participants, sample size, predictors, outcome, statistical analysis, results, and conclusions.	Page2/line17-31	Abstract/Para1-4
Introduction				
Background and objectives	3a	Explain the medical context (including whether diagnostic or prognostic) and rationale for developing or validating the multivariable prediction model, including references to existing models.	Page2-4/line37-73	Introduction/Para1-3
	3b	Specify the objectives, including whether the study describes the development or validation of the model or both.	Page4/line67-73	Introduction/Para4
Methods				
Source of data	4a	Describe the study design or source of data (e.g., randomized trial, cohort, or registry data), separately for the development and validation data sets, if applicable.	Page4/line75-88	Method/Para1
	4b	Specify the key study dates, including start of accrual; end of accrual; and, if applicable, end of follow-up.	Para5/line89-99	Method/Para2
Participants	5a	Specify key elements of the study setting (e.g., primary care, secondary care, general population) including number and location of centres.	Page4/line75-88	Method/Para1
	5b	Describe eligibility criteria for participants.	Page4/line75-88	Method/Para1
	5c	Give details of treatments received, if relevant.	Page4/line75-88	Method/Para1
Outcome	6a	Clearly define the outcome that is predicted by the prediction model, including how and when assessed.	Page4/line75-88	Method/Para1
	6b	Report any actions to blind assessment of the outcome to be predicted.	Page4/line75-88	Method/Para1
Predictors	7a	Clearly define all predictors used in developing or validating the multivariable prediction model, including how and when they were measured.	Page4/line75-88	Method/Para1
	7b	Report any actions to blind assessment of predictors for the outcome and other predictors.	Para5/line89-99	Method/Para2
Sample size	8	Explain how the study size was arrived at.	Page4/line75-88	Method/Para1

Missing data	9	Describe how missing data were handled (e.g., complete-case analysis, single imputation, multiple imputation) with details of any imputation method.	Page4/line75-88	Method/Para1
Statistical analysis methods	10a	Describe how predictors were handled in the analyses.	Page5-6.line100-124	Method/Para3-5
	10b	Specify type of model, all model-building procedures (including any predictor selection), and method for internal validation.	Page5-6.line100-124	Method/Para3-5
	10d	Specify all measures used to assess model performance and, if relevant, to compare multiple models.	Page5-6.line100-124	Method/Para3-5
Risk groups	11	Provide details on how risk groups were created, if done.	Page5-6.line100-124	Method/Para3-5
Results				
Participants	13a	Describe the flow of participants through the study, including the number of participants with and without the outcome and, if applicable, a summary of the follow-up time. A diagram may be helpful.	Page6-7/line126-140	Results/Para1
	13b	Describe the characteristics of the participants (basic demographics, clinical features, available predictors), including the number of participants with missing data for predictors and outcome.	Page6-7/line126-140	Results/Para1
Model development	14a	Specify the number of participants and outcome events in each analysis.	Page7-8/line142-155	Results/Para2
	14b	If done, report the unadjusted association between each candidate predictor and outcome.	Page7-8/line142-155	Results/Para2
Model specification	15a	Present the full prediction model to allow predictions for individuals (i.e., all regression coefficients, and model intercept or baseline survival at a given time point).	Page8/line157-169	Results/Para3
	15b	Explain how to use the prediction model.	Page9/line172-188	Results/Para4-5
Model performance	16	Report performance measures (with CIs) for the prediction model.	Page8-9/line157-188	Results/Para3-5
Discussion				
Limitations	18	Discuss any limitations of the study (such as nonrepresentative sample, few events per predictor, missing data).	Page13/line263-267	Discussion/Para6
Interpretation	19b	Give an overall interpretation of the results, considering objectives, limitations, and results from similar studies, and other relevant evidence.	Page9-10/line190-209	Discussion/Para1
Implications	20	Discuss the potential clinical use of the model and implications for future research.	Page9-10/line210-262	Discussion/Para2-5
Other information				
Supplementary information	21	Provide information about the availability of supplementary resources, such as study protocol, Web calculator, and data sets.	Page13-14/line272-288	Footnote/Para1-3
Funding	22	Give the source of funding and the role of the funders for the present study.	Page13-14/line279-282	Funding/Para1
