<u>Materials Design Analysis Reporting (MDAR)</u> Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided: section/paragraph)	n/a
For commercial reagents, provide supplier	Section Methods, paragraph Antibodys and reagents.	
name, catalogue number and RRID, if available.		

Cell materials	Yes (indicate where provided: section/paragraph)	n/a
Cell lines: Provide species information, strain.	Section Methods. paragraph Case selection, Cell lines	
Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID	and plasmids, and Bioinformatics.	
Primary cultures: Provide species, strain, sex of	primary culture was not conducted in the current study.	
origin, genetic modification status.		

Experimental animals	Yes (indicate where provided: section/paragraph)	n/a
Laboratory animals: Provide species, strain, sex, age,	Animal experiment was not conducted in the current	
genetic modification status. Provide accession	study.	
number in repository OR supplier name, catalog		
number, clone number, OR RRID		
Animal observed in or captured from the	Animal experiment was not conducted in the current	
field: Provide species, sex and age where	study.	
possible		
Model organisms: Provide Accession number	Animal experiment was not conducted in the current	
in repository (where relevant) OR RRID	study.	

Plants and microbes	Yes (indicate where provided: section/paragraph)	n/a
Plants: provide species and strain, unique accession number if available, and source (including location for collected wild specimens)	Plants and microbes was not used in the current study.	
Microbes: provide species and strain, unique accession number if available, and source	Plants and microbes was not used in the current study.	

Human research participants	Yes (indicate where provided: section/paragraph)	n/a
Identify authority granting ethics approval (IRB or	Section Methods. paragraph Case selection.	
equivalent committee(s), provide reference number		
for approval.		
Provide statement confirming informed consent	Section Methods. paragraph Case selection.	
obtained from study participants.		
Report on age and sex for all study participants.	Table. 1	

Design

Study protocol	Yes (indicate where provided: section/paragraph)	n/a
For clinical trials, provide the trial registration number OR cite DOI in manuscript.	This study was a retrospective study.	
Laboratory protocol	Yes (indicate where provided: section/paragraph)	n/a
Provide DOI or other citation details if detailed step- by-step protocols are available.	This study was a retrospective study.	
Experimental study design (statistics details)	Yes (indicate where provided: section/paragraph)	n/a
State whether and how the following have been done, or if they were not carried out.		
Sample size determination	Section Methods. paragraph Case selection.	
Randomisation	Section Methods. paragraph Case selection.	
Blinding	This study was a retrospective study.	
Inclusion/exclusion criteria	Section Methods. paragraph Case selection.	
Sample definition and in-laboratory replication	Yes (indicate where provided: section/paragraph)	n/a
State number of times the experiment was replicated in laboratory	Legends of Figure 2, 8, 9, and 10.	
Define whether data describe technical or biological replicates	Legends of Figure 2, 8, 9, and 10.	
Ethics	Yes (indicate where provided: section/paragraph)	n/a
Studies involving human participants: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Section Methods. paragraph Case selection.	
Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Animal experiment was not conducted in the current study.	
Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.	Section Methods. paragraph Case selection.	
Dual Use Research of Concern (DURC)	Yes (indicate where provided: section/paragraph)	n/a
If study is subject to dual use research of concern, state the authority granting approval and reference number for the regulatory approval	No.	

Analysis

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is	Section Methods. paragraph Case selection.	
excluded, and whether the criteria for exclusion were		
determined and specified in advance.		

Statistics	Yes (indicate where provided: section/paragraph)	n/a	
Describe statistical tests used and justify choice of	Section Methods. paragraph Statistical analysis.		
tests.			

Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available,	Section Data Sharing Statement.	
including protocols for access or restriction on		
access.		
If data are publicly available, provide accession	No.	
number in repository or DOI or URL.		
If publicly available data are reused, provide	Section Methods. Paragraph Bioinformatics.	
accession number in repository or DOI or URL, where		
possible.		

Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential		
for replicating the main findings of the study:		
State whether the code or software is available.	Section Methods. Paragraph Bioinformatics.	
If code is publicly available, provide accession	Section Methods. Paragraph Bioinformatics.	
number in repository, or DOI or URL.		

Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of		
discipline-specific guidelines, established and		
endorsed through community initiatives. Journals		
have their own policy about requiring specific		
guidelines and recommendations to complement		
MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI,	ICMJE guidelines were followed, as the journal follows	
ARRIVE) have been followed, and whether a checklist	ICMJE recommendations for publication.	
(eg., CONSORT, PRISMA, ARRIVE) is provided with		
the manuscript.
