Section/item	ltem No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Page2/Line42-44	Abstract/Para2
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Page2/Line44-57	Abstract/Para2-3
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Page3-5/Line70-108	Introduction/Para1-2
Objectives	3	State specific objectives, including any prespecified hypotheses	Page5/Line122-125	Introduction/Para4
Methods				
Study design	4	Present key elements of study design early in the paper	Page6/Line131-136	Methods/Para1
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page6/Line131-147	Methods/Para1-2
Participants	6	 (a) <i>Cohort study</i>—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up <i>Case-control study</i>—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls <i>Cross-sectional study</i>—Give the eligibility criteria, and the sources and methods of selection of participants 	Page6/Line137-147	Methods/Para2
		(b) Cohort study —For matched studies, give matching criteria and number of exposed and unexposed Case-control study —For matched studies, give matching criteria and the number of controls per case	N/A	N/A
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Page8/Line188-199	Methods/Para7-8
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	N/A	N/A
Bias	9	Describe any efforts to address potential sources of bias	N/A	N/A
Study size	10	Explain how the study size was arrived at	N/A	N/A
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	N/A	N/A

STROBE Statement-checklist of items that should be included in reports of observational studies

12	(a) Describe all statistical methods, including those used to control for confounding	Page9/Line209-217	Methods/Para9
	(b) Describe any methods used to examine subgroups and interactions	N/A	N/A
	(c) Explain how missing data were addressed	N/A	N/A
	(d) Cohort study —If applicable, explain how loss to follow-up was addressed Case-control study —If applicable, explain how matching of cases and controls was addressed Cross-sectional study —If applicable, describe analytical methods taking account of sampling strategy	N/A	N/A
	(e) Describe any sensitivity analyses	N/A	N/A
13*	(a) Report numbers of individuals at each stage of study-eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Page9/Line221-222	Results/Para1
	(b) Give reasons for non-participation at each stage	N/A	N/A
	(c) Consider use of a flow diagram	Page9/Line223	Results/Para1
14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	Page10/Line227-243	Results/Para2-3
	(b) Indicate number of participants with missing data for each variable of interest	N/A	N/A
	(c) Cohort study —Summarise follow-up time (eg, average and total amount)	N/A	N/A
15*	Cohort study – Report numbers of outcome events or summary measures over time	Page12/Line280-298	Results/Para8
	Case-control study – Report numbers in each exposure category, or summary measures of exposure	N/A	N/A
	Cross-sectional study – Report numbers of outcome events or summary measures	N/A	N/A
16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Page12-13/Line297-318	Results/Para9-10
	(b) Report category boundaries when continuous variables were categorized	N/A	N/A
	(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	N/A	N/A
17	Report other analyses done – eg analyses of subgroups and interactions, and sensitivity analyses	Page11-12/Line260-276	Results/Para7
			1
18	Summarise key results with reference to study objectives	Page14/Line338-343	Discussion/Para1
19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction	Page16-17/Line389-416	Discussion/Para6
	13* 14* 15* 16 17 18	13* (a) Bescribe any methods used to examine subgroups and interactions (b) Describe any methods used to examine subgroups and interactions (c) Explain how missing data were addressed (d) Cohort study—If applicable, explain how loss to follow-up was addressed Case-control study—If applicable, explain how matching of cases and controls was addressed Case-control study—If applicable, describe analytical methods taking account of sampling strategy (e) Describe any sensitivity analyses 13* (a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed (b) Give reasons for non-participation at each stage (c) Consider use of a flow diagram 14* (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders (b) Indicate number of participants with missing data for each variable of interest (c) Cohort study—Summarise follow-up time (eg, average and total amount) 15* Cohort study—Report numbers of outcome events or summary measures over time Case-control study—Report numbers of outcome events or summary measures (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included (b) Report category boundaries when cont	12 (a) Describe any methods, including index based to control of controlloring 14 (b) Describe any methods used to examine subgroups and interactions N/A (c) Explain how missing data were addressed N/A (d) Cohort study—If applicable, explain how matching of cases and controls was addressed N/A Case-control study—If applicable, explain how matching of cases and controls was addressed N/A (a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed N/A (b) Give reasons for non-participation at each stage N/A (c) Consider use of a flow diagram Page9/Line221-222 (b) Indicate number of participants (eg demographic, clinical, social) and information on exposures and potential confounders Page9/Line223 (c) Cohort study—Equipants (eg demographic, clinical, social) and information on exposures and potential confounders N/A (b) Indicate number of participants with missing data for each variable of interest N/A (c) Cohort study—Report numbers of outcome events or summary measures over time Page12/Line280-298 Case-control study—Report numbers in each exposure category, or summary measures of exposure N/A (f) Give unadjusted estimates and, their porticipate with confounders were adjusted for and why they were included

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	N/A	N/A				
Generalisability	21	Discuss the generalisability (external validity) of the study results	N/A	N/A				
Other information								
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	Page18/Line424-427	Acknowledgments/Para1				

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
