

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/atm-21-174	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The time and distribution analysis data of top 100 most cited articles in particular will be shared, and we also found an increasing trend between the citation density and the time with Mann-Kendall trend test, which testified the growing importance of Wnt signalling.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	The search strategy and criteria, Data extraction and Statistical analysis plan will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the literature database would be updated over time.
7	To whom will you share the data?	Medical researchers and data analysts who are interested in studies of Wnt signalling and bibliometric analysis.
8	For what type of analysis or purpose?	For analysis to evaluate the Wnt signalling related field and bibliometric study.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: tianlong.huang@csu.edu.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
