### <u>Materials Design Analysis Reporting (MDAR)</u> Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

## **Materials**

Antibodies	Yes (indicate where provided: section/paragraph)	n/a
For commercial reagents, provide supplier		$\sqrt{}$
name, catalogue number and RRID, if		

Cell materials	Yes (indicate where provided: section/paragraph)	n/a
Cell lines: Provide species information, strain. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID		<b>√</b>
Primary cultures: Provide species, strain, sex		
of origin, genetic modification status.		

Experimental animals	Yes (indicate where provided: section/paragraph)	n/a
<b>Laboratory animals:</b> Provide species, strain, sex, age, genetic modification status. Provide accession number in repository <b>OR</b> supplier name, catalog number, clone number, <b>OR</b> RRID		<b>√</b>
Animal observed in or captured from the field: Provide species, sex and age where possible		1
Model organisms: Provide Accession number in repository (where relevant) OR RRID		<b>V</b>

Plants and microbes	Yes (indicate where provided: section/paragraph)	n/a
<b>Plants:</b> provide species and strain, unique accession number if available, and source (including location for collected wild specimens)		√
Microbes: provide species and strain, unique accession number if available, and source		<b>√</b>

Human research participants	Yes (indicate where provided: section/paragraph)	n/a
Identify authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	√Methods/Participants and Footnote/Ethical Statement	
Provide statement confirming informed consent obtained from study participants.	√Methods/ Participants and Footnote/Ethical Statement	
Report on age and sex for all study participants.	√Results/Characteristics of the 57 participants and Table 1	

### **Design**

Study protocol	Yes (indicate where provided: section/paragraph)	n/a
For clinical trials, provide the trial registration number <b>OR</b> cite DOI in manuscript.		√
number of the Dor in manuscript.		

Laboratory protocol	Yes (indicate where provided: section/paragraph)	n/a
Provide DOI or other citation details if detailed step- by-step protocols are available.	√Methods/Valve mNGS and References/12. Miao Q, Ma Y, Wang Q, et al. Microbiological Diagnostic Performance of Metagenomic Next-generation Sequencing When Applied to Clinical Practice. Clin Infect Dis 2018;67:S231-40	

Experimental study design (statistics details)	Yes (indicate where provided: section/paragraph)	n/a
State whether and how the following have been done,		
<b>or</b> if they were not carried out.		
Sample size determination		√
Randomisation		<b>√</b>
Blinding		√
Inclusion/exclusion criteria	√Methods/Participants	

Sample definition and in-laboratory replication	Yes (indicate where provided: section/paragraph)	n/a
State number of times the experiment was replicated in laboratory		1
Define whether data describe technical or biological replicates		1

Ethics	Yes (indicate where provided: section/paragraph)	n/a
Studies involving human participants: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	√Methods/Participants and Footnote/Ethical Statement	
Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.		1
Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.		1

<b>Dual Use Research of Concern (DURC)</b>	Yes (indicate where provided: section/paragraph)	n/a
If study is subject to dual use research of concern,		$\sqrt{}$
state the authority granting approval and reference		
number for the regulatory approval		

### **Analysis**

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is	√Methods/Participants and Figure 1	
excluded, and whether the criteria for exclusion were		
determined and specified in advance.		

Statistics	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of	√Methods/Statistical analysis	
tests.	•	

Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available, including protocols for access or restriction on access.		~
If data are publicly available, provide accession number in repository or DOI or URL.		1
If publicly available data are reused, provide accession number in repository or DOI or URL, where possible.		1

Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential for replicating the main findings of the study:		
State whether the code or software is available.		$\checkmark$
If code is publicly available, provide accession number in repository, or DOI or URL.		1

# Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of		
discipline-specific guidelines, established and		
endorsed through community initiatives. Journals		
have their own policy about requiring specific		
guidelines and recommendations to complement		
MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI,	ICMJE guidelines were followed, as the journal follows	
ARRIVE) have been followed, and whether a	ICMJE recommendations for publication	
checklist (eg., CONSORT, PRISMA, ARRIVE) is	•	
provided with the manuscript.
