

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/atm-21-1419	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes. I would like to share data collected for our study to others.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Risk factors for predicting the occurrence of MOM in particular will be shared, and we also found a correlation between negative expression of ERbeta with the occurrence of MOM which has seldom been provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Medical oncologists and gastrointestinal surgeons who are interested in studies of distant metastasis of gastric cancer (GC), especially the ovarian metastasis.
8	For what type of analysis or purpose?	For analysis to predict the occurrence of metachronous ovarian metastasis for GC patients receiving curative gastrectomy.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: jianpeng.gao@shca.org.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
