

Materials Design Analysis Reporting (MDAR) Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: [doi:10.31222/osf.io/9sm4x](https://doi.org/10.31222/osf.io/9sm4x)). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided:	n/a
For commercial reagents, provide supplier name, catalogue number and RRID, if available.	Yes, in method section, paragraph 1,2,3,4,5,6	
Cell materials	Yes (indicate where provided:	n/a
Cell lines: Provide species information, strain. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID	Yes, in method section, paragraph 1,2	
Primary cultures: Provide species, strain, sex of origin, genetic modification status.		N/a No primary culture is used
Experimental animals	Yes (indicate where provided:	n/a
Laboratory animals: Provide species, strain, sex, age, genetic modification status. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID		N/A NO ANIMALS WERE USED
Animal observed in or captured from the field: Provide species, sex and age where possible		N/A NO ANIMALS WERE USED
Model organisms: Provide Accession number in repository (where relevant) OR RRID		N/A NO MODEL ORGANISMS WERE USED
Plants and microbes	Yes (indicate where provided:	n/a
Plants: provide species and strain, unique accession number if available, and source (including location for collected wild specimens)		N/A NO PLANTS WERE USED
Microbes: provide species and strain, unique accession number if available, and source		N/A NO MICROBES WERE USED
Human research participants	Yes (indicate where provided:	n/a
Identify authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.		N/A NO HUMAN PARTICIPANTS IN CURRENT STUDY
Provide statement confirming informed consent obtained from study participants.		N/A NO HUMAN PARTICIPANTS IN CURRENT
Report on age and sex for all study participants.		N/A NO HUMAN

Design

Study protocol	Yes (indicate where provided:	n/a
For clinical trials, provide the trial registration number OR cite DOI in manuscript.		N/A NO CLINICAL TRIALS WERE USED
Laboratory protocol	Yes (indicate where provided:	n/a
Provide DOI or other citation details if detailed step-by-step protocols are available.	YES, IN METHOD SECTION, PARAGRAH 1,2,3,4,5	
Experimental study design (statistics details)	Yes (indicate where provided:	n/a
State whether and how the following have been done, or if they were not carried out.		
Sample size determination	YES, IN RESULT SECTION,	
Randomisation		N/A, NO RANDOMIZATION WERE USED
Blinding		N/A NOT USED
Inclusion/exclusion criteria		N/A ALL DATA WERE USED
Sample definition and in-laboratory replication	Yes (indicate where provided:	n/a
State number of times the experiment was replicated in laboratory		N/A IT WAS NOT REPEATED
Define whether data describe technical or biological replicates		N/A REPLICATE WERE NOT USED
Ethics	Yes (indicate where provided:	n/a
Studies involving human participants: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.		N/A NO HUMAN PARTICIPANT
Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.		N/A NO ANIMAL PARTICIPANT
Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.		N/A ALL DONE IS CELLS. NO NEED FOR PERMIT
Dual Use Research of Concern (DURC)	Yes (indicate where provided:	n/a
If study is subject to dual use research of concern, state the authority granting approval and reference number for the regulatory approval		N/A, IT IS NOT DURC

Analysis

Attrition	Yes (indicate where provided:	n/a
State if sample or data point from the analysis is excluded, and whether the criteria for exclusion were determined and specified in advance.		N/A, ALL DATA INCLUDED
Statistics	Yes (indicate where provided:	n/a
Describe statistical tests used and justify choice of tests.	USING MVDA, DUE TO AMOUNT OF DATA USED. EXPLAIN IN RUSLT SECTION, PARRGRAPH 3,4	

Data Availability	Yes (indicate where provided:	n/a
State whether newly created datasets are available, including protocols for access or restriction on access.		N/A, NEW DATA HAVE NOT GENERATED
If data are publicly available, provide accession number in repository or DOI or URL.		N/A, NOT AVAILABLE TO PUBLIC
If publicly available data are reused, provide accession number in repository or DOI or URL, where possible.		N/A, NOT AVAILABLE TO PUBLIC

Code Availability	Yes (indicate where provided:	n/a
For all newly generated code and software essential for replicating the main findings of the study:		N/A ALL CODE ARE BY CURRENT SOFTWARE
State whether the code or software is available.		N/A ALL CODE BELONG TO VEDNER
If code is publicly available, provide accession number in repository, or DOI or URL.		N/A ALL CODE BELONG TO VEDNER

Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.	ICMJE guidelines were followed, as the journal follows ICMJE recommendations for publication.
